

MIDWESTERN STATE UNIVERSITY

## Course Syllabus: Adult Critical Care

Robert D. & Carol Gunn College of Health Sciences & Human Services

RESP 3543 Section 201

Spring 2025: January 21 - May 16

### Contact Information

Instructor: Erica Judie, DHSc, RRT-ACCS

Office: Centennial Hall 420H

Office hours: By appointment

Office phone: (940) 397-4642

E-mail: [erica.judie@msutexas.edu](mailto:erica.judie@msutexas.edu)

### Textbook & Instructional Materials

Cairo, J. (2020). Pilbeam's mechanical ventilation: physiological and clinical applications. 7th ed. St. Louis, Mo.: Elsevier.

ISBN: 978-0323551274

18 month Subscription to Classmate Learning Resources – Place your order by:

- Accessing URL: <https://www.classmateLR.com/purchase>
- Clicking Purchase from the menu bar on the home page
- Student Access Code **kcn38e3**

### **Additional material will be provided via D2L.**

### Weekly Meeting Pattern

Monday & Wednesday: 930am - 1200pm CE 250

### Course Description

The focus of this lecture course is a thorough review of ventilatory support techniques. Emphasis is placed on adult applications; however some neonatal and pediatric support techniques are covered. Topics include etiology of respiratory failure, physical implications of positive pressure ventilation, methods of providing support, prescribing machine settings and managing the patient-ventilator system, hemodynamic and gas exchange monitoring, weaning techniques and non-invasive applications.

### Course Objectives

Upon completion of this course, the student will be able to:

1. Discuss the basic design features of ventilators
2. Classify ventilators and how they work

3. Define what constitutes a mode of ventilation
4. Classify and discuss modes of ventilation
5. Explain the indications for basic modes of ventilatory support
6. Discuss the effects of mechanical ventilation on oxygenation, ventilation and lung mechanics
7. Discuss the effects of mechanical ventilation on other body systems
8. Describe the complications and hazards of providing mechanical ventilatory support
9. Discuss how to minimize the adverse effects of mechanical ventilation
10. Review the indications for mechanical ventilation
11. Identify and assess patients who need ventilatory support
12. Describe how to choose the correct ventilator to begin ventilatory support
13. Describe how to select the appropriate mode of ventilation for a patient condition
14. Describe how to apply initial settings, assess response and make appropriate adjustments
15. Describe the types of monitoring best applied to patients receiving mechanical ventilation in the ICU
16. Discuss monitoring and trouble-shooting the patient-ventilator system in the ICU
17. Explain how to evaluate a patient before attempting ventilator discontinuance or weaning
18. Describe the techniques, advantage and disadvantages of various weaning methods

#### Study Hours and Tutoring Assistance

Please refer to Lattes & Learning Schedule, schedule a tutoring time with professor via sign up, attend student led tutoring, or setup an appointment with the professor.

#### Student Handbook

Refer to: [Student Handbook](#)

#### Academic Misconduct Policy & Procedures

Academic Dishonesty: Cheating, collusion, and plagiarism (the act of using source material of other persons, either published or unpublished, without following the accepted techniques of crediting, or the submission for credit of work not the individual's to whom credit is given). Additional guidelines on procedures in these matters may be found in the Office of Student Conduct.

#### Grading

Course Grade - \*\*A minimum grade of 75 (C) is required in all respiratory courses. Failure to attain a minimum grade of C will prevent the student from progressing in the program.

Table 1: Grading Scale.

Grade	Percentage
A	90-100%
B	80 to 89%
C	75 to 79%
D	60 to 74%
F	Less than 60%

Table 1: Percentage allocated to each assignment

Assignments	Percentage
Lecture Examinations (5)	55%
Homework/Classroom Assignments	10%
Classmate Simulations	10%
Clinical Applications Project	10%
Final Examination	15%
Total	100%

#### Lecture Examinations

During the semester there will be in-depth exams covering the specified material. Examinations may consist of true/false, multiple choice, short answer or essay questions. The examinations will count towards 50% of the overall grade. Students will be granted 85 minutes to complete each exam. These will appear on the Course Schedule in more detail.

#### Homework

Each lecture will have a homework assignment. These will be completed on D2L under the assignment tab. The assignment is due on the following day from the lecture at 11:59pm. Homework may be found in D2L.

#### Classmates Simulations

Classmates is a special program designed to help students build strong clinical skills using online Clinical Simulations and other learning tools. Classmates will also track and report the progress of each student as well as the entire class.

Classmates allows you to practice applying the concepts taught in class and lab by exposure to clinical problems improving your ability to think on your feet. These exercises will build critical-thinking and problem-solving skills.

Classmate simulation scenarios will be assigned throughout the semester as needed to reinforce concepts introduced in the classroom and lab. You will be provided several practice simulations and **four** simulations will be assigned as a testing scenario and will be worth 10% of your grade.

### Clinical Applications Project

Students will complete a project to present to the class dealing with specific problems in mechanical ventilation: Details below.

### Final Examination

The final will be a comprehensive examination consisting of any combination of true/false, multiple choice, short answer or essay questions.

### Missed Homework/Exam Policy

Each student should make every effort to ensure that all assignments are submitted in a timely manner. A 10% reduction will be taken for each day after the scheduled due date for the assignment. If a student is going to miss an examination, it is the student's responsibility to contact the instructor prior to the exam to arrange with the instructor to make up the missed exam. A 15% reduction will be taken for each day (weekends and holidays included) after the scheduled exam date. The professor reserves the right to make unscheduled exams essay in nature and considerably more challenging.

### Extra Credit

Extra credit will not be given in this course.

### Self-Plagiarism

Self-plagiarism is commonly described as recycling or reusing one's own specific words from previously published or submitted work. While it doesn't cross the line of true theft of others' ideas, it nonetheless can create issues in the scholarly publishing world. Beyond verbatim sections of text, self-plagiarism can also refer to the publication of identical papers in two places (sometimes called "duplicate publication"). Papers, projects, or other assignments previously submitted in other courses will not be accepted in this course.

### Important Dates

Last day for term schedule changes: January 24

Deadline to file for graduation: February 17

Last Day to drop with a grade of "W:" April 30

Refer to: [Drops, Withdrawals & Void](#)

### Desire-to-Learn (D2L)

Extensive use of the MSU D2L program is a part of this course. Each student is expected to be familiar with this program as it provides a primary source of communication regarding assignments, examination materials, and general course information. You can log into [D2L](#) through the MSU Homepage. If you experience difficulties, please contact the technicians listed for the program or contact your instructor.

## Attendance

Students are expected to attend all meetings of the classes in which they are enrolled. Students not attending at least 70% of classes per unit will not be granted access to the lecture exams pertaining to that unit. In the case of a COVID absence (with proper MSU documentation), a zoom link will be granted to attend courses. All other absences will be considered unexcused and a zoom link will not be granted.

## Online Computer Requirements

Taking an online class requires you to have access to a computer (with Internet access) to complete and upload your assignments. It is your responsibility to have (or have access to) a working computer in this class. **Assignments and tests are due by the due date, and personal computer technical difficulties will not be considered reason for the instructor to allow students extra time to submit assignments, tests, or discussion postings.** Computers are available on campus in various areas of the buildings as well as the Academic Success Center. **Your computer being down is not an excuse for missing a deadline!!** There are many places to access your class! Our online classes can be accessed from any computer in the world which is connected to the internet. Contact your instructor immediately upon having computer trouble. If you have technical difficulties in the course, there is also a student helpdesk available to you. The college cannot work directly on student computers due to both liability and resource limitations; however, they are able to help you get connected to our online services. For help, log into [D2L](#).

## Change of Schedule

A student dropping a course (but not withdrawing from the University) within the first 12 class days of a regular semester or the first four class days of a summer semester is eligible for a 100% refund of applicable tuition and fees. Dates are published in the Schedule of Classes each semester.

## Refund and Repayment Policy

A student who withdraws or is administratively withdrawn from Midwestern State University (MSU) may be eligible to receive a refund for all or a portion of the tuition, fees, and room/board charges that were paid to MSU for the semester. HOWEVER, if the student received financial aid (federal/state/institutional grants, loans, and/or scholarships), all or a portion of the refund may be returned to the financial aid programs. As described below, two formulas (federal and state) exist in determining the amount of the refund. (Examples of each refund calculation will be made available upon request).

## Services for Students with Disabilities

In accordance with Section 504 of the Federal Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, Midwestern State University endeavors to make reasonable accommodations to ensure equal opportunity for qualified persons with disabilities to participate in all educational, social, and recreational

programs and activities. After notification of acceptance, students requiring accommodations should make application for such assistance through Disability Support Services, located in the Clark Student Center, Room 168, (940) 397-4140. Current documentation of a disability will be required in order to provide appropriate services, and each request will be individually reviewed. For more details, please go to [Disability Support Services](#).

### College Policies

Campus Carry Rules/Policies

Refer to: [Campus Carry Rules and Policies](#)

Smoking/Tobacco Policy

College policy strictly prohibits the use of tobacco products in any building owned or operated by WATC. Adult students may smoke only in the outside designated-smoking areas at each location.

Alcohol and Drug Policy

To comply with the Drug Free Schools and Communities Act of 1989 and subsequent amendments, students and employees of Midwestern State are informed that strictly enforced policies are in place which prohibits the unlawful possession, use or distribution of any illicit drugs, including alcohol, on university property or as part of any university-sponsored activity. Students and employees are also subject to all applicable legal sanctions under local, state and federal law for any offenses involving illicit drugs on University property or at University-sponsored activities.

### Grade Appeal Process

Students who wish to appeal a grade should consult the Midwestern State University [Undergraduate Catalog](#)

### Course Schedule:

Notice

Changes in the course syllabus, procedure, assignments, and schedule may be made at the discretion of the instructor.

## Course Schedule

Week	Date	Topic	Reference	Assignments
1	Jan. 22	-Syllabus Review -Basic Terms/Concepts for MV -How Ventilators Work	Ch. 1 Ch. 2	
	Jan. 23			HW #1 due by 1159pm
2	Jan. 27	-How a Breath is Delivered -Need for MV	Ch. 3 Ch. 4	
	Jan. 28			HW #2 due by 1159pm
	Jan. 29	<b>-Exam #1 (2pm-330pm)</b>		<i>BoBo Brazil-due by 2pm</i>
3	Feb. 3	-Selecting Vent & Mode	Ch. 5	
	Feb. 4			HW #3 due by 1159pm
	Feb. 5	-Initial Vent Settings -Final Vent Setup	Ch. 6 Ch. 7	
	Feb. 6			HW #4 due by 1159pm
4	Feb. 10	-Initial Pt. Assessment -Ventilator Graphics	Ch. 8 Ch. 9	
	Feb. 11			HW #5 due by 1159pm
	Feb. 12	<b>-Exam #2 (2pm-330pm)</b>		
5	Feb. 17	-Improve Ventilation	Ch. 12	
	Feb. 19	-Improve Oxygenation	Ch. 13	
	Feb. 20			HW #6 due by 1159pm
<b>6-9</b>	<b>Clinic Rotation and Spring Break</b>			
10	Mar. 31	-Assessment of Resp. Function -Hemodynamics	Ch. 10 Ch. 11	
	Apr. 1			HW #7 due by 1159pm
	Apr. 2	<b>-Exam #3 (2pm-330pm)</b>		<i>Paul Lyer-due by 2pm</i>
11	Apr. 7	-VAP -Sedative, Analgesics, Paralytic	Ch. 14 Ch. 15	
	Apr. 8			HW #8 due by 1159pm
	Apr. 9	-Extrapulmonary Effects of MV -Effects of PPV	Ch. 16 Ch. 17	
	Apr. 10			HW #9 due by 1159pm
12	Apr. 14	<b>-Exam #4</b> -Troubleshooting/Problem Solve	Ch. 18	<i>Shelly Ann Bazen-Atkins due by 930am</i>
	Apr. 15			HW #10 due by 1159pm
	Apr. 16	-Weaning -Special Techniques	Ch. 20 Ch. 23	
	Apr. 17			HW #11 due by 1159pm
13-14	<b>Clinic Rotation</b>			
15	May 5	<b>-Exam #5</b>		<i>Lee Ann Wenner-due by 930am</i>
	May 7	-Project Presentations @ 900		
16	May 14	Final Exam @ 9am		

## Clinical Application Project

**OVERVIEW:** In the context of a group project, students will **address a specific disease in mechanical ventilation** and present their work to the class.

### Outline

**DISEASE PROCESS:** Present a clinical case for one of the following problems:

ARDS, Asthma, Neuromuscular disease, Emphysema, Pulmonary embolism, Flail Chest, Pneumonia, Interstitial Lung Disease

**Present:**

- **a review of the patient assessment**
- **disease etiology**
- **the groups most affected**
- **the prevalence of the disease or condition**

**PULMONARY PATHOLOGY:** Describe the effects on the lung, including gas exchange disruption and pulmonary mechanics i.e. compliance and resistance.

**VENTILATOR MANAGEMENT STRATEGIES:** Outline contemporary views on the ventilator management of the disease process. Utilize all resources including textbooks (Egan), periodicals (Chest, ARRD, JAMA), and web based sources (ARDSNET).

**OUTCOMES:** In this section the group should present outcomes data. For example, information related to **mortality and morbidity**.

**Project management** – Students will be allowed to self-select into groups and topics will be chosen randomly. Each group will only have one topic to present and the groups will contain no more than 2 to 3 persons. Completed projects will be presented at the end of the semester and comprise a percentage of the final grade. Rubric can be found in D2L.

### Project Requirements

- 15 minute presentation
- 10-20 slides (not including title and reference slides)
- APA format is to be used throughout the presentation
- Minimum of 5 current resources are needed
- Be creative!!! Add pictures, x-rays, etc. as needed
- Every team member must speak
