EDUCATION AND PROFESSIONAL CERTIFICATIONS

EDUCATION

Doctorate	A.T. Still University	currently attending	Health Sciences
M.S.R.S.	Midwestern State University	2008	Radiologist Assistant
Post-Baccalaureate Certificate	Midwestern State University	2006	Radiologist Assistant
B.S.R.S.	Midwestern State University	2006	Radiologic Sciences
A.A.S.	Midland College	1998	Radiography

PROFESSIONAL CERTIFICATIONS

Certifications: American Registry of Radiologic Technologists (Number 326139)
Computed Tomography 2018-Present
Registered Radiologist Assistant: 2006- Present
Cardiovascular Interventional Radiology: 2002- Present
Radiography: 1998-Present

Licenses: Texas Medical Board- Medical Radiologist Assistant
(Number MRA02000002)
Montana Professional & Occupational Licensing Bureau- Board of Radiologic Technologists
(Number RTS-RT-LIC-22879)

PROFESSIONAL EXPERIENCE

Midwestern State University, Wichita Falls, TX

Associate Professor	2016- present
Assistant Professor (tenured 2014)	2009-2016
Adjunct Faculty	2009

Texas Health Resources Presbyterian Dallas, Dallas, TX

Interventional Radiologic Technologist	2006-2011
Coding Specialist	2006-2009
CT Technologist	2006-2009

Midland Memorial Hospital, Midland, TX

Interventional Radiologic Technologist	2002-2006
Cardiac Cath Lab Technologist	2002-2004

Radiologic Technologist 1998-2002

Medical Center Hospital, Odessa, TX

Radiologic Technologist PRN 2003-2004

Permian Regional Hospital Andrews, TX

Radiologic Technologist PRN 2003

Refresher Modules

Commissioned by the ASRT to develop RA refresher modules to be placed on the ARRT website for Continuing Qualification Requirements (CQR). Twenty-five modules were completed including:

Modified Barium Swallow	Liver Biopsy	Thoracentesis
Esophagus	Thyroid Biopsy	Retrograde urethrogram
Upper GI	Fluoroscopy for Diaphragmatic	Cystogram/ VCUG
Small Bowel Follow-through	motion	Antegrade urography
Enteroclysis	Arthrogram	Loopography
NG/NJ tube placement	Lumbar puncture	Tube exchange
Contrast Enema	Lumbar puncture with contrast	Hysterosalpingogram
T-tube cholangiogram	Myelogram	Sentinel Node Injection
Defecography	Paracentesis	

Accreditation

American Registry of Radiologic Technologists Radiologist Assistant Educational Program Recognition (2018)-The purpose of this project was to be recognized and/or have recognition extended by ARRT. Radiologist assistant (RA) programs must meet recognition criteria that include accreditation, clinical education, and preceptorship requirements. Initial recognition may be granted for a period of up to three years, at which time the program must apply again for ongoing recognition. I was primarily responsible for the Midwestern State University's reaffirmation application for the program. The ARRT Board evaluated the RA program and voted to award recognition for five years, which is the maximum duration that may be awarded.

Current Projects

Radiologist Assistant Peer-Review Practices and Perceptions Study- The purpose of this study is to understand the current peer-review processes for Radiologist Assistants and gather their perceptions of peer review and those processes. As principal investigator, I developed the proposal, survey instruments, and study information for IRB approval. Once approved the American Registry of Radiologic Technologists sent the survey link to participants. Data collection and analysis are currently being conducted with a manuscript to be submitted to *Radiologic Technology*.

Radiologist Assistant Compensation and Practice Study- The purpose of this project is to gather data on the radiologist assistant's salary and practice environment. The project is performed in conjunction with the Society of Radiology Physician Extenders (SRPE). As principal investigator, I developed the 2018 and 2023 survey instruments, gathered data, analyzed the data, and wrote the executive summary of findings. The 2018 findings were published by the SRPE and the 2023 findings were published in July 2023.

Past Projects

Radiologist Assistant Quality Measures Project- The purpose of this project was to establish a data collection tool for use by radiologist assistants (RAs) to document selected quality measures in the clinical environment. The first step in the project was to assess the practice of RAs. The American Society of Radiologic Technologists and I formulated a survey, which was distributed in May 2015, to assess the practice of RAs and to assess the willingness to participate in quality measures reporting. From the survey results, the top five quality measures that RAs stated were important will be used to begin a database of RA measurement reporting.

Patient Satisfaction with Radiologist Assistants Project- While patient satisfaction with other mid-level providers has been thoroughly examined, patient satisfaction with the RA has yet to be explored. This study was to determine the level of satisfaction with the care provided by RAs in the United States to see how the RA compared to other mid-level providers. I developed survey instruments that were distributed by RAs across the country who in turn distributed the instrument to their patients. The results showed RAs were comparable to other mid-level providers. The manuscript was accepted for publication in *Radiologic Technology* in 2014.
