

Curriculum Vitae
Dr. Karen J. Moriarty
MSU Office: 940-397-4047
karen.moriarty@msutexas.edu

EDUCATION

Doctor of Nursing Practice, 2007
Rush University
Chicago, IL

Bachelor of Science, Nursing, 1993
University of Texas at Arlington
Arlington, TX

Master of Science, Nursing, 1997
West Texas A & M University
Canyon, TX

Associate of Science, Nursing, 1979
Fairmont State College
Fairmont, WV

PROFESSIONAL CERTIFICATIONS AND LICENSURE

American Heart Association
Basic Life Support

Texas Board of Nursing
Advance Practice Nurse - Family Nurse
Practitioner, Prescriptive Authority

American Nurses Credentialing Center
Certified Family Nurse Practitioner

United States Department of Justice
DEA Registration

PROFESSIONAL EXPERIENCE

Academia

Midwestern State University, Wilson School of Nursing
Associate Professor
Fall 2012 to present (tenure and promotion in 2012)

Associate Professor
Interim Graduate Coordinator of APRN Programs
Interim PMHNP Program Coordinator
Academic Year 2015-16

Associate Professor
Interim PMHNP Program Coordinator
Interim FNP Program Coordinator
Fall 2013 to August 2014

Chair, Associate Professor
Summer 2010 to fall 2013

Interim Chair, Assistant Professor
Summer 2009 to 2010

Graduate Coordinator, Assistant Professor
Fall 2007 to fall 2011

FNP Program Coordinator, Assistant Professor
Spring 2005 to summer 2009

Graduate Faculty Member
Spring 2005 to present (Full since 2008)

Adjunct Faculty
2000 to 2005

Practice

Family Nurse Practitioner
Park Clinic
Iowa Park, TX
Fall 2015 to present

Family Nurse Practitioner
DEKA Healthcare Solutions, PLLC
Wichita Falls, TX
Fall 2013 to Fall 2015

Family Nurse Practitioner
North Texas State Hospital, Wichita Falls, TX
1997 to 2013

Chief Nurse Executive
North Texas State Hospital, Wichita Falls, TX
1997

Nurse Manager
North Texas State Hospital, Vernon, TX
1989 to 1997

Staff Nurse, Electra Memorial Hospital, Electra, TX
1994 to 1997

Staff Nurse, Charge Nurse, Shift Supervisor
1979 to 1989

Polvado, K. (2007, April). *Barriers to the Integration of the Practice Doctorate of Nursing*. Presented at the National Organization of Nurse Practitioner Faculties, Denver, CO.

Polvado, K. (2007, March). *A Community Approach to Health Promotion*. Presented at the Art and Science of Health Promotion Conference, San Francisco, CA.

RESEARCH

Applied Research

Clinical Guidelines for Treatment of COVID-19 in Nursing Home Patients, Park Clinic, Iowa Park, TX. During the height of the COVID-19 pandemic, long-term care residents with symptomatic COVID-19 infection had to be managed within the long-term care facilities. This presented a challenge because the first evidence-based research published on the treatment of COVID-19 infection did not address how to treat this special population within their facilities, but rather how to treat all adults in an acute care facility. An analysis was done on evidence-based literature to-date and I established a clinical guideline for treatment of COVID-19 positive patients at three local nursing homes and one post-acute skilled nursing facility in Wichita Falls, TX. The clinical guideline addressed symptom presentation nuances in the geriatric population, isolation/quarantine of patients including those with dementia, and medical management of symptoms. Medical management included testing method and frequency; medications recommended to enhance the immune system; and medication recommendations to treat circulatory, respiratory, and gastrointestinal symptoms. October, 2020 – January, 2021.

Standardizing Detection of Peripheral Neuropathy in Patients with Type 2 Diabetes, Park Clinic, Iowa Park, TX. Patients with Type 2 Diabetes Mellitus are at risk of developing peripheral neuropathy in their feet. Symptoms of peripheral neuropathy are often unrecognized by patients; however, can be detected by a healthcare provider. The literature supports that a comprehensive foot exam be done every 3 months on this patient population. Additional factors that can lead to the development of diabetic peripheral neuropathy include poorly-controlled blood sugars, hypertension, obesity, and tobacco use. Unrecognized and undetected peripheral neuropathy can result in serious consequences for the patient include infected foot ulcers, amputation, and death. Park Clinic uses an Electronic Medical Record (EMR) for documenting patient encounters. The current EMR did not include an area in which to document a comprehensive foot examination. As a result, a comprehensive template was developed and added to the EMR. May-November, 2018.

Review, Update, and Implementation of Ebola Treatment Protocols, Sierra Leone, Africa
The emergence of Ebola Virus Disease in an underdeveloped country (Sierra Leone) presented many challenges in treatment. There were three Ebola Treatment Units (ETUs) in the Port Loko District of Sierra Leone and treatments were often based on best real-time outcomes, available

resources, and dependent on effective communication between clinicians at the ETUs. As a clinician, I was responsible for evaluating the best evidence (real-time and via limited internet access) to determine the best treatment for our patients with Ebola. For example, patients in the ETU at Maforki (one of the chiefdoms in Port Loko) did not sleep under mosquito nets as nets were not available. Investigation revealed that the incidence of malaria in this population could be reduced if artesunate was given as a malaria prophylaxis; therefore, artesunate was added to the Ebola treatment protocol. March-April, 2015

Infection Prevention and Control: A Risk Assessment of Port Loko Government Hospital, Sierra Leone, Africa. As a clinician in Port Loko, I was tasked with performing a risk assessment at the local government hospital. The one and only physician at the hospital was quarantined after an exposure to a person with Ebola. Performing a risk assessment included evaluating current infection control procedures/processes at the hospital, reviewing current literature for infection control protocols from the Centers for Disease Control and the World Health Organization, and making recommendations for change. This applied research project revealed a major risk for exposure due to a number of issues including a lack of a secure perimeter of the hospital, inadequate triage, poor waste management, lack of adequate supplies, and inadequate hand-washing stations. This applied research project resulted in the appointment of an Infection Prevention and Control (IPC) officer for the hospital who was responsible for developing infection control policies/procedures, securing resources from the local government, and educating the hospital staff. March-April, 2015

Assessment of Post-Ebola Sequela in Pediatric and Adult Ebola Survivors, Sierra Leone, Africa
The Ebola Outbreak of 2014 produced more survivors of Ebola Virus Disease than in all previous Ebola outbreaks combined. The support provided by various government and non-governmental agencies (international response) in the country of Sierra Leone provided an opportunity to establish a clinic for Ebola survivors. As an Ebola Response Clinician, I participated in a multidisciplinary and multi-organizational effort to set up a clinic in Lunsar, a district in Sierra Leone, which bordered the district of Port Loko. I reviewed and modified the physical assessment form and referral procedure/form to meet the needs of the patients. For example, we discovered that many Ebola survivors were having issues with vision due to complicating uveitis (a sequela of Ebola), so we set up the clinic next door to an ophthalmologist who agreed to perform comprehensive eye examinations on the survivors based on a referral from the clinician. March-April, 2015

A Clinical Guideline for Testosterone Replacement Therapy

Developed an evidence-based clinical guideline for treatment of men with low testosterone. The guideline included appropriate testosterone dosages based on laboratory results and individual variables, frequency of monitoring, and how to detect adverse effects. The guideline was implemented at a local clinic that specializes in men's health.
October 2013

Statewide At-Risk Tracking and Intervention for Nurses (SATIN)

Grant Funded – Texas Higher Education Coordinating Board, \$87,080
June 2011 to May 2013

The Use of a Dedicated Education Unit (DEU) to Increase Student Enrollment

Co-Principal Investigator

Grant Funded – Texas Higher Education Coordinating Board, \$292,728
Fall 2010 to August 2012

Student Success Program for WSON

Funded by the Texas Higher Education Coordinating Board, Nursing Shortage
Reduction – Under 70 Program, \$194,491
Fall 2009 to August 2011

The Practice Doctorate of Nursing: Are We Ready?

Principal Investigator

A qualitative study to identify the perceived barriers and facilitators to the integration of
Advance Practice Nurses with a DNP in the Wichita Falls area

Grant Funded – MSU Faculty Grant, \$4,586
Academic Year 2007-08

A Community Approach to Weight Loss

Principal Investigator

A descriptive study of participants in the North Texas State Hospital “Biggest Loser” competition
July 2007

Traditional Research

*The Influence of Nocturnal Sleep Duration, Quality of Sleep, and Post-Prandial Napping on Daily
Cortisol Patterns.*

Principal Investigator: Dr. Karen Moriarty

Co-investigator: Dr. Soon-Mi Choi

Amount awarded: \$5000

Academic Year 2018-19

NOTE: The funds for this project were awarded at the end of the fall 2018 semester.
Unfortunately due to unexpected health issues, I did not feel that I would be able to devote the
time necessary to adequately implement this project. My co-investigator, Dr. Choi, was not able
to take on the responsibility of primary investigator; therefore, the funds were returned.

Motivation to Ride in the Hotter ‘n Hell Hundred Bicycling Event

Co-Investigator

A descriptive study of the motivational influences to participate in the annual Hotter ‘n Hell
bicycling event in Wichita Falls, TX.

Summer – Fall 2016

Estradiol Levels in Men Receiving Intramuscular Testosterone

Principal Investigator

A combined-method study to identify relationships between age, body composition,
testosterone levels, and estradiol levels in men receiving intramuscular testosterone

Grant Funded – MSU Faculty Grant, \$4,982

Academic Year 2014-15

Motivation for Health Promoting Behaviors

Co-Investigator

A survey of Hotter 'N Hell Hundred event participants was completed to determine their motivation to participate.

August 2014

Project Discover: A Community Needs Assessment of the North Texas HIV/AIDS Population

Co-Investigator (Principal Investigator: Dr. Beverly Stiles)

A qualitative study to identify needs of the HIV/AIDS population in North Texas

Grant Funded – US Department of Health and Texas Department of State Health Services

Fall 2007

Behavioral Risk Survey of Community Health Fair Participants

Principal Investigator

A descriptive study of behavioral risk factors of health fair participants

April 2006

Competency to Stand Trial: A Comparison of Outcomes of Inpatient Competency Training with Court Determination of Competency

Co-Investigator

Fall 1995

Additional Grants (awarded)

Texas Higher Education Coordinating Board, Nursing Shortage Reduction Program Grant Awards:

Academic Year	Award Amount
2012-13	\$15,423
2011-12	\$73,259
2010-11	\$98,187
2009-10	\$274,357

U.S. Department of Health and Human Services, Health Resources and Service Administration (HRSA) Grants: Advanced Education Nursing Traineeship

Academic Year	Award Amount
2011-12	\$18,698

Grant Writing (not awarded)

Academic Year 2014-15: Participated in the WSON's application for a HRSA grant.

Academic Year 2013-14: Participated in MSU's application for the National Institutes of Health *Building Infrastructure Leading to Diversity (BUILD) Initiative* (RFA-RM-13-016) with Dr. Deborah Garrison and several MSU faculty; proposed to be one of four Principal Investigators along with Dr. Magaly Rincon-Zachary, Dr. Dale McDonald, and Dr. Mike Shipley.
