## TEACHING PROFESSIONAL

---

Highly self-driven, results-oriented with a positive outlook, and a clear focus on high quality, optimal student learning and organizational outcomes. I am a forward planner who critically assesses my own performance, and very open to constructive feedback. As a reliable, tolerant, and determined individual, I am able to work with and navigate various personalities, situations, and settings. I am an empathic communicator who is able to see things from the other person's point of view, as well as, keen for new experiences, responsibility, and accountability. I am able to communicate and motivate via written media and verbal communication, and require little instruction in self-starting and on-the-job training. I am experienced and able to manage learners in a variety of experiential learning settings, i.e., the classroom, clinical, and laboratory settings. I am adept in a variety of online platforms, to include MOODLE, Canvas, Desire to learn, and blackboard. I am also adept in using Microsoft word, excel, Google documents, similar databases. I am able to design and implement basic traditional and online course curriculum, manage course syllabi, classroom activities, and evaluate student learning and outcomes to evaluate whether student learning outcomes were met or generate targeted action plans geared at generating student outcomes success.
