Wichita Falls, TX

PROFILE

I graduated with my BSRT in May of 2020 and began working at Wise Health System. Shortly after, I was offered a full-time X-Ray position at a family practice in Wichita Falls, TX. As a result of working as a stand-alone technologist, I stepped into a supervisor-like role. I graduated summa cum laude with my master's degree in Radiologic Science, and as a member of the Lambda Nu Honors Society, in December of 2023. I began my role as an adjunct professor of radiology in January of 2024.

SKILLS

Radiography with DR and CR equipment, Patient Care, Leadership, Fluoroscopy, Microsoft Office, Communication, Organization, APA Format Writing, Online Education, Desire2Learn, Teachable, Motivated

EXPERIENCE

Adjunct Professor

Midwestern State University | 2025

I am teaching RADS 3523, Essentials of Research, at MSU Texas for the undergraduate radiology students during the spring semester of 2025. This is an in-person/hybrid course, so my role includes lecture one day per week, along with frequent online grading and communication via email with students throughout the semester.

Adjunct Professor

Midwestern State University | 2024

I taught RADS 3523, Essentials of Research, at MSU Texas for the undergraduate radiology students during the spring semester. This was a hybrid course, so my role included lecture one day per week, along with frequent online grading and communication via email with students throughout the semester.

X-Ray Technologist

Family Practice Associates | 2020 - 2023

My role as Lead X-Ray Technologist came with several responsibilities additional to X-Ray examinations: state inspection and manual upkeep, communication with radiologists and physicians, training PRNs, and transferring patient demographics for insurance. I have some additional experience in bone densitometry, although we only serviced bone density examinations for a short time.

X-Ray Technologist

Wise Health System | 2020 - 2021

At Wise Health System, I was hired on as a PRN x-ray technologist. I performed x-ray examinations in the ER, on outpatients and inpatients, and outpatient and inpatient fluoroscopy examinations. I developed great training, teaching, and patient care skills during my time at WHS.
