

Beginning Algebra
Math 0003-X10 FALL 2020

Course Essential Information

Professor: Marina Lynn Jones

E-Mail: marina.jones@msutexas.edu

Online Office Hours: Monday/Wednesday 3:00 – 4:00pm and Tuesday/Thursday 2:30 – 4:00 pm CDT/CST. These times are subject to change after surveying the class and any change will be promptly communicated via D2L. Other times may be available by request; information will be communicated via D2L on how to request alternate times. I try to reply to all emails received within 24 hours but will not send replies after 6pm or on weekends.

Help/tutoring resource: MSU's Tutoring & Academic Support (TASP) office is located on the first floor of Moffet Library. TASP offers in-person and online, when applicable, tutoring both by appointment and on a walk-in basis for students on campus. A program for students who have only distance learning classes and cannot be on campus is being piloted this fall. Check out TASP on the MSU website for additional information.

Course Description: This course is designed to include topics in elementary algebra which will prepare each student for Intermediate Algebra or the co-requisite mathematics course that will fulfill the core requirements of the student's degree plan. Students must earn a "C" or better in this course to advance to the next required mathematics course.

Textbook & Instructional Materials: MyMathLab (MML), an online program from Pearson Publishing, is required. An e-copy of the textbook is included in the purchase of this program, so it is not necessary to purchase a hardcopy of the textbook. Textbook: Beginning and Intermediate Algebra (7th ed) by Lial et al.

Additional Required Materials/Expenses: A laptop or desktop computer with a webcam and internet access is required. Chromebooks, tablets, and mobile devices will not satisfy the technical specifications for the proctored assessments that will be required. The fee-per-use service ProctorU will be used for at least one or two tests, including the required comprehensive final exam. In addition, a simple calculator is recommended and a spiral notebook (or loose-leaf binder) is required.

Online Course Requirements

Desire-to-Learn (D2L)

Extensive use of the MSU D2L program is a part of this course. Each student is expected to be familiar with this program as it provides a primary source of communication regarding assignments, examination materials, and general course information. You can log into [D2L](#) through the MSU Homepage.

My Math Lab (MML)

**** MyMathLab is a REQUIRED portion of this course.****

This online course management program from Pearson Publishing is used for most assessments in the course. A specific MML course has been created for your class and is linked from the D2L course. Required digital materials for this course are part of the Courseware Access and Affordability Program at MSU Texas. Students are charged for required course materials on their student account with the Business Office. Any students who wish to opt-out of the Program and purchase the required course materials on their own must do so prior to 09/04/20. Opt-out instructions are sent to students' official my.msutexas.edu email address after the first day of class. Please contact the MSU Bookstore if you have any questions about the opt-out process. If you opt-out of this program, then you will need to purchase MML, either from the campus bookstore or directly online from the publisher. When using MML for the first time in this course, you will need to run a browser check and download necessary plug-ins including the Pearson Lockdown Browser.

Computer/Internet Access

Taking an online class requires you to have access to a computer and internet access to complete assignments, participate in D2L discussion, and to take quizzes and tests. *Assignments and tests are due by the due date, and personal computer technical difficulties will not be considered reason for the instructor to allow students extra time to submit assignments, tests, or discussion postings.* Your computer being down is not an excuse for missing a deadline. It is your responsibility to have, or have access to, a working computer with internet access and a webcam in this class. There are many places to access your class; our online classes can be accessed from any computer in the world which is connected to the internet. If you have technical difficulties using a personal computer, first check your computer security settings, your pop-up settings, and/or try a different browser. If you continue to have technical difficulties, then you will need to contact either the MSU D2L support page or Pearson's MML customer technical support.

Attendance and Participation Policies

Attendance/Participation

Attendance is an essential component of this course and is required. If this were a traditional face-to-face class, the attendance policy for Math 0003 would state: If you are absent from more than four classes, you may receive a grade of "F" for excessive absences and lack of participation. In this online course, daily attendance, at a minimum level, corresponds to logging into the D2L course homepage. Online attendance expands to include participation in required activities such as discussion forums, specific check-in activities, adhering to communication requests, and completing homework assignments in a timely manner.

Excused or Unexcused Absences

This policy will be interpreted in accordance with the attendance requirements stated above. Absences are not categorized as excused or unexcused. All absences from class will be counted as official absences except authorized absences as defined in the Student Handbook. If you miss class due to hospitalization or a death in your family, you should notify the Dean of Students immediately. Absences due to required

participation in university-sponsored activities must be approved by the Athletic Director and the Vice President for Academic Affairs. It is the responsibility of the student to arrange with the instructor to make up all work missed during an authorized absence.

Drop Policies

Instructor Drops: Instructors may drop a student from class for disruptive conduct which could include inappropriate comments made via email or discussion forums, consistently failing to complete class assignments, as well as excessive absences as outlined above. A student dropped for any of these reasons will receive a course grade of "F".

Student Drops: If you wish to drop this course, you must first contact your instructor. Students who have not met the readiness standards of the Texas Success Initiative must continue to attend class and may not drop this course prior to Monday, October 19, 2020. The last day to drop in order to receive a "W" is 4:00 p.m. on Friday, December 4, 2020. Students receiving financial aid should contact the financial aid office before initiating a student drop.

Withdrawal Dates

First Day available to drop with a grade of "W" is October 19, 2020.

Last Day to drop with a grade of "W" is December 4, 2020.

Course Structure and Schedule

The course is designed to be completed in a sequential manner and to maintain the same general pacing as a traditional face-to-face class. The course content consists of four units; refer to MML or the Schedule of Assignments posted on D2L for a complete listing of sections covered in each unit. There is a pronounced structure of prerequisites as you progress through MML in each unit: homework > quiz > homework > quiz > unit test. Each forward progression requires meeting a minimum grade standard: 70% on homework assignments and 60% on quizzes.

Evaluation/Grading Policies

D2L Assignments/Assessments

There are various graded activities that are only accessed through D2L; examples include all required discussions and any D2L quizzes/tests.. Individual D2L log-in activity, including access of available instructor-created supplemental material, is required and will be closely monitored. Any D2L-generated grades will be manually added to your MML gradebook so that all course grades will be located in one place. The full D2L gradebook is not utilized in this course.

MML Homework

A MML online homework assignment has been created for each textbook section included in the course. You are required to keep your assignments organized in a spiral notebook (or loose-leaf binder) in which you will write out the step-by-step work needed to solve each problem. You may be asked to present evidence of your work during "spot checks", tutoring sessions, or as documentation. MML assignments are set up to allow you multiple opportunities to get credit for each problem and thus attain a very good homework grade. There are numerous and varied supplemental media resources provided as part of MML. Even though these items are not always specifically required for completion of an assignment, be aware that these types of

resources are available to you as additional tools to aid in your understanding of the material. You must make at least a 70% on each homework assignment in order to continue forward progress in the course. At the end of the semester, the lowest three homework scores will be dropped; the remaining scores will be averaged to determine your homework grade for the course.

MML or D2L Quizzes

Short quizzes are also included as part of the course work grade generated in MML or administered through the D2L course. A quiz cannot be opened and attempted until after the pertinent homework assignments are completed successfully. Unlike the homework assignments, you only get one opportunity to answer each question correctly. A minimum quiz grade of 60% is required as a prerequisite to proceed to the next assignment. Students are allowed two attempts at each quiz. At the end of the semester, the lowest quiz score will be dropped before computing the final course grade.

Tests

There are four unit tests, each worth 100 points. At present, these tests are scheduled on September 18, October 9, October 30, and November 20. All tests in the course will be administered online and will utilize various proctoring options including the Pearson Lockdown Browser built into MML, the Respondus Lockdown Browser and Monitor available through D2L, or the fee-per-use service ProctorU which provides live video proctoring.

In general, if a test date is missed, a grade of zero will be recorded and there will be no makeup test possible. In extenuating circumstances that include prompt communication by the student, it may be possible to replace the zero on the missed test with the grade earned on the comprehensive final exam up to a maximum grade of 70%. This is at the instructor's discretion and is determined on a case-by-case basis.

Final Exam

The final exam is required for course completion. It is comprehensive and worth 200 points. It must be proctored using the ProctorU service. As previously stated, online options for proctoring an exam result in an additional expense for the student and require the use of a webcam. There is no makeup available for the final exam. The final exam is tentatively scheduled for December 3, 2020.

Grading

There will be four unit tests, a comprehensive final exam, and a coursework grade which will be generated from all required assignments and quizzes (both D2L and MML). This semester the maximum number of total points possible is 700 points, and the point breakdown is as follows:

- Test #1 – 100 points
- Test #2 – 100 points
- Test #3 – 100 points
- Test #4 – 100 points
- Final exam – 200 points
- Assignments, including MML homework and D2L required participation items – 50 points
- Quizzes, including MML and designated D2L items – 50 points

The final course grade will be determined by the earned percentage of possible points. The point range for each letter grade is as follows: 630-700 points earns an A, 560-629 points earns a B, 490-559 points earns a C, 420-489 points earns a D, and below 420 points earns an F.

Exception to the above point breakdown: In general, the course grade cannot be more than one letter grade higher than the grade earned on the comprehensive final exam.

Important Notice

Changes in the course syllabus, policies and procedures, assignments, and schedule may be made at any time at the discretion of the instructor.

University Policies

Services for Students With Disabilities

In accordance with Section 504 of the Federal Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, Midwestern State University endeavors to make reasonable accommodations to ensure equal opportunity for qualified persons with disabilities to participate in all educational, social, and recreational programs and activities. After notification of acceptance, students requiring accommodations should make application for such assistance through Disability Support Services, located in the Clark Student Center, Room 168, (940) 397-4140. Current documentation of a disability will be required in order to provide appropriate services, and each request will be individually reviewed. For more details, please go to [Disability Support Services](#).

Campus Carry Rules/Policies

Refer to: [Campus Carry Rules and Policies](#)

Academic Misconduct Policy & Procedures

Students should refer to the current MSU Student Handbook and Activities Calendar and the MSU Undergraduate Bulletin for university policies on academic dishonesty, class attendance, student rights & activities.

[Student Handbook 2017-18](#)

MSU Texas Return to Campus Plan

A comprehensive plan that includes new procedures designed to help protect you and those you love.
