Instructor Use of Generative AI

I integrate generative AI into my teaching to enhance—not replace—human learning, creativity, and critical thinking. I use AI applications as collaborative partners for ideation, drafting, feedback, and the refinement of teaching materials, while maintaining full responsibility for

content and accuracy. I do not use this technology to assess student work. I do not input other people's work or personally identifiable information into AI tools. My approach emphasizes ethical, transparent use aligned with academic integrity, equity, and the development of transferable skills. I also aim to model responsible engagement with emerging technologies, emphasizing thoughtful boundaries rather than rigid prohibitions. I strive for transparency around AI use by adding AI disclosure statements and/or citations to all work generated for this course in collaboration with AI tools.

Student Use of Generative AI

The use of artificial intelligence applications, including but not limited to ChatGPT, Claude, Gemini, DALL·E, Grammarly, or similar applications, may be used for planning activities such as brainstorming, outlining, and idea development. However, all final submissions should show evidence that students have developed and refined these ideas on their own without additional generative AI use. Students are expected to apply what they are learning in this course to produce work for this class, drawing on their developing knowledge, understanding, and skills. When using generative AI in permitted contexts as outlined in the syllabus or explicitly permitted by the instructor, you are responsible for ensuring that AI-generated content is properly cited, accurate, ethical, and free of misinformation or intellectual property violations. AI-generated content must never be submitted as your own work. Doing so may constitute a violation of academic integrity and may be referred to the Office of Student Conduct. Please contact me if you have questions regarding this course policy.

Any generative AI use should be cited *AND* clearly disclosed according to the instructions in this syllabus. An example of an APA citation (7th ed. format) is seen here: OpenAI. (2025). ChatGPT (May 2024 version) [Large language model]. <https://chat.openai.com>
