Course Description

This course provides students with engaging, comprehensive, and up-to-date coverage of all aspects of the criminal justice system. This course will give students the foundational knowledge that they need to be critical thinkers and active participants within the criminal justice field. By exploring criminal justice from a balanced perspective with an issues-oriented approach, students will understand how decision-making is critical to the criminal justice process. In particular, students will come to appreciate how their own future careers will be shaped by the decisions they make. I chose a textbook that explores criminal justice from a student-centered perspective by presenting research-driven material in an accessible, clear, and succinct writing style.
