

SYLLABUS MENG 2223 – 301: MECHANICS OF SOLIDS (Required Course) Summer I - 2022

COURSE INSTRUCTOR

Dr. Zeki Ilhan (<u>zeki.ilhan@msutexas.edu</u>) Office: McCoy Hall 219E Phone: (940) 397-4004

TEACHER ASSISTANT

Mr. Trevon Antoine (trevonantoine21@gmail.com)

CLASS SCHEDULE

Days	Time	Location
Monday	12:20 pm – 02:20 pm	MY 207
Tuesday	12:20 pm – 02:20 pm	MY 207
Wednesday	12:20 pm – 02:20 pm	MY 207
Thursday	12:20 pm – 02:20 pm	MY 207
Friday		

OFFICE HOURS

Days	Time	Location
Monday	11:00 am – 12:00 pm	MY 219E
Tuesday	11:00 am – 12:00 pm	MY 219E
Wednesday	11:00 am – 12:00 pm	MY 219E
Thursday	11:00 am – 12:00 pm	MY 219E
Friday		

ATTENDANCE POLICY

This course will be delivered predominantly in "face-to-face" mode. Attendance is mandatory, and it represents a part of your overall grade. Attendance will be <u>checked randomly on select lectures</u> using the <u>AttendMe</u> app. (Detailed instructions on how to download and use the app will be made available in the lectures).

COVID-19 PROCEDURES & REPORTING

Any student (vaccinated or unvaccinated) who has a laboratory confirmed case of COVID-19 must complete the <u>COVID-19 Reporting Form for Students</u>. This form will be used to notify campus health professionals and residence life staff (if you reside on campus) and generate <u>*absence notifications*</u> to your instructors.

For the most up-to-date information, please refer to the <u>Updated COVID-19 Procedures</u> at MSU Texas website.

LIVESTREAMING OPTION

Do not attend face-to-face classes if you are sick or experiencing COVID-19 symptoms. However, livestreaming option is possible <u>only</u> for those students with valid medical excuse. To request access for livestreaming, students must email the instructor first and explain their excuse. The instructor <u>may</u> ask for a <u>doctor's report</u> or <u>absence</u> <u>notification</u>, and then provide the <u>Zoom</u> link to accommodate those students for livestreaming the class.

MASK REQUIREMENT

Face coverings are *strongly recommended* when *around others* and *indoors*, especially during the first 2-3 weeks of classes and during the peak activity of the omicron variant. The wearing of masks while in public indoor settings and frequently washing your hands has proven to be effective at preventing the spread of COVID-19.

D2L (DESIRE 2 LEARN) & PULSE APP

I will use <u>D2L</u> platform for posting lecture notes, assignments, and grades. Mobile version of the D2L platform is the <u>Pulse</u> app. Consider downloading it for instant notifications on announcements, content, grades, and more.

TECHNOLOGY REQUIREMENT

For the online portion of this class, students are required to have access to a hardware (computer, laptop, or iPad with webcam, microphone, and/or speakers), a basic scanning device and/or software such as <u>Camscanner</u>. Be sure to review <u>D2L technology requirements</u> at MSU Texas website for online students.

CATALOG DESCRIPTION

Analysis of structures using stress-strain diagrams, generalized Hooke's law, stress and strain due to axial, torsional, shear, and flexural loads.

COURSE PRE-REQUISITES

MENG 2113 - Statics

REQUIRED TEXTBOOK

Mechanics of Materials by R. C. Hibbeler, 10th Edition, Pearson (2017). ISBN-13: 978-0-13-431965-0

LIST OF TOPICS COVERED*

- Stress and Strain
- Mechanical Properties of Materials
- Axial Loads
- Torsional Loads

- Shear Force Bending Moment Diagrams
- Bending Loads
- Transverse Shear
- Combined Loadings

*Additional material might be covered as the time permits.

GRADING SCHEME

The overall grade for the course will be based on the scores earned on the tests, homework assignments, and the class attendance. The contribution of each grade item to the overall score is provided in Table 1.

Table 1: Percentage contribution of each grade item to the overall grade.

Grade Items	Contribution
Test 1	25%
Test 2	25%
Final Exam	30%
Homework	15%
Attendance (online or in-class)	5%
TOTAL	100%

FINAL EXAM

Thursday, June 30, 12:20 pm – 02:20 pm

CONFLICT RESOLUTION PROCESS

- 1. In the event of an issue with the course or the instructor, the student should first contact the instructor face to face or via e-mail. The faculty and the student will discuss the issue, and hopefully, a resolution is reached.
- 2. The student should notify the faculty via email again if the issue still did not get resolved after step 1.
- **3.** If not resolved, the student could then contact the Chair of the McCoy School of Engineering, Dr. Desai, face to face or via email, (<u>raj.desai@msutexas.edu</u>) and discuss the issue.
- **4.** Dr. Desai will discuss the issue at hand with the faculty member. Dr. Desai will discuss the result of this discussion with the student. Hopefully, a resolution is reached on the issue after this step.
- 5. The student should notify the Chair via email if the issue still did not get resolved.
- 6. The Chair will contact the Dean and try to resolve the conflict. In case the conflict deals with the student grade, she will forward the case to the Grade Appeals Committee, if necessary.

COURSE ORGANIZATION AND ASSESMENT

- <u>Course Format</u>: This course consists of four 120-minute sessions each week. Class meetings will contain lecture sessions that cover the relevant topics for that particular class. Not all material can be covered during the class session, hence, expect to spend extra time outside of class to finish reviewing the material.
- <u>Student Attitude</u>: Once class starts, the use of cell phones, conducting private discussions, using the computer (unless requested by the instructor), working on anything that is not directly related to the course, and making derogatory remarks about your classmates or instructor will not be accepted and may result in your dismissal from the class.
- <u>Midterm Progress Reports</u>: To help students keep track of their class progress, the instructor for this class could provide an unofficial Midterm Progress Report for at-risk students via D2L email after the Test 1. Midterm grades will not be reported on the students' transcript; nor will they be calculated in the cumulative GPA. They simply give students an idea of where they stand at the midpoint of the semester. Students earning below a C at the midway point should schedule a meeting with the professor and seek out tutoring.
- Homework Evaluation Method: Your performance will be tested regularly throughout the semester by homework assignments. While several homework problems may be assigned as part of a homework assignment, it may be the case that only a subset of problems will be graded. However, you must attempt all problems. *Do not try to guess which problems will not be graded.*
- <u>Late Assignments</u>: Homework assignments must be turned in on the due date, at the due time. Late assignments will *NOT* be accepted. However, depending on the number of assignments and the overall class progress, *one (or two) of the lowest graded assignments may not be included in the final grade.*
- **Exam Make-up:** Make-up exams will be given only in case of a *medical emergency* (accompanied by a doctor's report) or a major conflict due to a scheduled *athletic event* or a *conference*.
- <u>General Study Guidelines</u>: Plan on spending few hours outside of class each week to review the material weekly, and to work on homework assignments. Do not wait until the last day to start the homework or to prepare for exams. Utilize office hours throughout the semester whenever you need help about the assignments or the course material.
- <u>Academic Integrity Policy</u>: Scholastic dishonesty will not be tolerated and will be prosecuted to the fullest extent. You are expected to have read and understood the current issue of the student handbook regarding student responsibilities & rights, and the intellectual property policy information about procedures and what constitutes acceptable on-campus behavior.
- **<u>Disability Support Services</u>**: If you have a documented disability that will impact your work in this class, please contact the <u>Disability Support Services</u> and the instructor to accommodate your needs.
- **<u>Disclaimer Statement</u>**: Information contained in this syllabus, including grading policies, may be subject to change with advance notice, as deemed appropriate by the instructor.
- <u>Campus Carry Rules/Policies</u>: Senate Bill 11 passed by the 84th Texas Legislature allows licensed handgun holders to carry concealed handguns on campus, effective August 1, 2016. Areas excluded from concealed carry are appropriately marked, in accordance with state law. For more information, please refer to <u>campus carry rules and policies</u>.

COURSE OBEJCTIVES IN RELATIONSHIP TO ABET STUDENT OUTCOMES

SPECIFIC OUTCOMES OF INSTRUCTION		2	3	4	5	6	7
Define average normal and shear stresses and strains.							X
Apply Hooke's law and understand the relationship between stress and strain.							X
Calculate normal stresses and strain for axially loaded member.							X
Calculate normal stresses and strain for statically indeterminate axially-loaded members.	X						X
Calculate the shear stresses and angle of twist for torsional loaded member.							X
Calculate the internal shear forces and bending moments for beams under different loading scenarios.	X						X
Draw the shear force and bending moment diagrams for beams under different loading scenarios.	X						X
Estimate the flexural stresses for beams under bending loads.							X
Estimate shear stresses and shear flow in built-up members.							X
Estimate the optimum fastener spacing in built-up members.							X
Apply superposition and estimate stresses caused by combined loadings.							X

Table 2: Specific outcomes of instruction matched with the ABET student outcomes (1-7)

Table 3: Detailed descriptions of the ABET student outcomes (1-7) listed in Table 2.

OUTCOME	DESCRIPTION
1	an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering science and mathematics
2	an ability to apply engineering design to produce solutions that meets specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3	an ability to communicate effectively with a range of audiences.
4	an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5	an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6	an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7	an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
