Course Description

This class will introduce students to the study of film and its relationship to society, culture, and technology. Understanding film requires reading it from a number of perspectives: as a technology, as a business, as entertainment, as art, and perhaps most importantly, as a socio-cultural artifact which, to some extent, reflects the cultural conditions under which it is produced and received. Towards that end, the class will introduce and explore a wide variety of issues related to the study of film: production, distribution, reception, aspects of film form and style, genre, auteur theory, realism, and formalism. The class will also introduce broader concepts of ideology and representation as theorized within cultural studies, and provide an overview of film history in relation to issues of human diversity.

Students will begin to develop the necessary skills for analyzing film form and meaning in relation to the larger spheres of culture and ideology.

Students who are unwilling to explore issues of race, class, gender, and sexuality within an educational framework should consider enrolling in another class.
