

SYLLABUS
MENG 2113 – 101: STATICS
(Required Course)
Fall 2023

COURSE INSTRUCTOR

Dr. Zeki Ilhan (zeki.ilhan@msutexas.edu)
Office: McCoy Hall 219E
Phone: (940) 397-4004

TEACHER ASSISTANT

TBA

CLASS SCHEDULE

<i>Days</i>	<i>Time</i>	<i>Location</i>
Monday	10:00 am – 10:50 am	MY 207
Tuesday		
Wednesday	10:00 am – 10:50 am	MY 207
Thursday		
Friday	10:00 am – 10:50 am	MY 207

OFFICE HOURS

<i>Days</i>	<i>Time</i>	<i>Location</i>
Monday	11:00 am – 12:00 pm	MY 219E
Tuesday	05:00 pm – 06:00 pm	MY 219E
Wednesday	12:00 pm – 02:00 pm	MY 219E
Thursday		
Friday	11:00 am – 12:00 pm	MY 219E

ATTENDANCE POLICY

This course will be delivered in face-to-face mode. Attendance is mandatory, and it represents a part of your overall grade. Attendance will be ***checked randomly on select lectures*** using the AttendMe app. (Detailed instructions on how to download and use the app will be made available in the lectures).

COVID-19 UPDATES & PROCEDURES

For the most up-to-date information, please refer to the Updated COVID-19 Procedures at MSU Texas website: (<https://msutexas.edu/coronavirus/index.php>)

D2L (DESIRE 2 LEARN) & PULSE APP

I will use the D2L platform (<https://d2l.msutexas.edu/d2l/home>) for posting the syllabus, course communication, lecture notes, assignments, and grades. Mobile version of the D2L platform is the Brightspace Pulse app, which is available for free on iPhone, iPad, and Android devices. Consider downloading Pulse for instant notifications: (<https://apps.brightspace.com/pulse/launch>)

STUDENT RESOURCES

For quick links to numerous offices and student services available on the MSU Campus, please refer to the MCOSME Student Resources website: (https://msutexas.edu/academics/scienceandmath/student_resources.php)

USE OF GENERATIVE AI (ChatGPT)

Since writing, analytical, and critical thinking skills are part of the learning outcomes of this course, all writing assignments should be prepared by the student. Developing strong competencies in this area will prepare you for a competitive workplace. Therefore, AI-generated submissions are not permitted and will be treated as plagiarism in this course.

CATALOG DESCRIPTION

A study of forces and force systems, resultants and components of force systems, forces due to friction, conditions of equilibrium, and forces acting on frame structures.

COURSE PRE-REQUISITES

PHYS 1624 – Mechanics, Wave Motion & Heat

MATH 1634 – Calculus I

REQUIRED TEXTBOOK

Engineering Mechanics – Statics, by R.C. Hibbeler, 15th edition, Pearson, 2021. ISBN-13: 9780134814971

LIST OF TOPICS COVERED*

- Introduction to Mechanics
- Force Vectors
- Particle Equilibrium
- Rigid Body Equilibrium
- Structural Analysis
- Center of Gravity
- Centroid
- Moment of Inertia
- Composite Bodies

**Additional material might be covered as the time permits.*

GRADING SCHEME

The overall grade will be based on the scores earned on the tests, homework assignments, and attendance. The exams account for 80% of the total grade, while homework assignments account for 15%, and the attendance represents the remaining 5%. The contribution of each grade item to the overall score is provided in Table 1.

Table 1: Percentage contribution of each grade item to the overall grade.

Grade Item	Contribution
Test 1	25%
Test 2	25%
Final Exam	30%
Homework	15%
Attendance	5%
TOTAL	100%

FINAL EXAM

Wednesday, December 13, 10:30 am – 12:30 pm

CONFLICT RESOLUTION PROCESS

1. In the event of an issue with the course or the instructor, the student should first contact the instructor. The faculty and the student will discuss the issue. Hopefully, a resolution is reached.
2. The student should notify the faculty via email again if the issue still did not get resolved after the first communication.
3. If not resolved, the student could then contact the Chair of the McCoy School of Engineering, Dr. Desai, face to face or via email, (raj.desai@msutexas.edu), and discuss the issue.
4. Dr. Desai will discuss the issue at hand with the faculty member. Dr. Desai will discuss the result of this discussion with the student. Hopefully, a resolution is reached on the issue after this step.
5. The student should notify the Chair via email if the issue still did not get resolved.
6. The Chair will contact the Dean and try to resolve the conflict. In case the conflict deals with the student grade, she will forward the case to the Grade Appeals Committee, if necessary.

COURSE ORGANIZATION AND ASSESMENT

- **Course Format:** This course consists of three 50-minute sessions each week. Class meetings will cover the most essential lecture topics and some example problems. Due to time limitations, not all the material in the textbook can be covered during the class; hence, follow the instructor's guidance and the lecture notes in D2L to relate the lecture material to the relevant chapters/sections of the textbook. You will ***not*** be responsible for those chapters/sections of the textbook that are not covered in the class.
- **General Study Guidelines:** Plan on spending few hours outside of class ***each week*** to carefully review the lecture material discussed during the week. It is better to ***go through the in-class exercises again, before working on the homework assignments.*** Do not wait until the last day to prepare for exams. Utilize office hours throughout the semester whenever you need help about the assignments or the course material.
- **Student Attitude:** After the class starts, the use of phones, conducting private discussions, working on anything that is not directly related to the course, and making derogatory remarks about your classmates or instructor will not be accepted and may result in your dismissal from the class.
- **Midterm Progress Reports:** In order to help students keep track of their progress toward course objectives, the instructor will provide a Midterm Progress Report for at-risk students through their WebWorld account. Midterm grades will not be reported on the students' transcript; nor will they be calculated in the cumulative GPA. They simply give students an idea of where they stand at the midpoint of the semester. Students with a midterm grade below a C should talk to the professor and seek out tutoring.
- **Homework Evaluation Method:** Your performance will be tested regularly throughout the semester by homework assignments. While several homework problems may be assigned as part of a homework assignment, it may be the case that only a subset of problems will be graded. However, you must attempt all problems. ***Do not try to guess which problems will not be graded.***
- **Late Assignments:** Homework assignments must be submitted on the due date, at the due time. Late assignments will ***NOT*** be accepted. However, depending on the overall class progress, ***one (or two) of the lowest graded assignments may not be included in the final grade.***
- **Exam Make-up:** Make-up exams will be given only in case of an ***emergency*** (accompanied by a doctor's report) or a major conflict due to a scheduled ***athletic event*** or a ***conference.***
- **Grade Appeals:** Grade appeals should be resolved with the instructor. If unresolved, they need a formal written appeal to the dean of the college in which the course was taught. For more information, consult the Grade Appeal Checklist through the MCOSME Student Resources website, or through the link: (https://msutexas.edu/academics/scienceandmath/assets/files/grade_appeal_checklist1.pdf)
- **Academic Honesty Appeals:** Academic honesty appeals are reported to the chair. If unresolved, they are appealed to the department chair of the department offering the course. Consult the Academic Honesty Checklist through the MCOSME Student Resources website, or through the link: (https://msutexas.edu/academics/scienceandmath/assets/files/academic_honesty_checklist1.pdf)
- **Disability Support Services:** If you have a documented disability that will impact your work in this class, please feel free to contact the instructor and the Disability Support Services to accommodate your needs through their website: (<https://msutexas.edu/student-life/disability>)
- **Disclaimer Statement:** Information contained in this syllabus, other than grading policies, may be subject to change with advance notice, as deemed appropriate by the instructor.

COURSE OBJECTIVES IN RELATIONSHIP TO ABET STUDENT OUTCOMES

Table 2: Course objectives matched with the ABET student outcomes (1-7)

COURSE OBJECTIVES	1	2	3	4	5	6	7
Students will be able to utilize vector operations to manipulate and determine properties of force vectors.	X						
Students will be able to determine conditions of equilibrium using free body diagrams.	X	X					
Students will be able to determine moments of forces through scalar and vector means.	X						
Students will be able to utilize vector operations to specify couple moments.	X						
Students will be able to study conditions for equilibrium of rigid bodies.	X	X					
Students will be able to invoke structural analysis including method of sections.	X	X					
Students will determine the center of gravity, mass, and the centroid of a body.	X						
Students will be able to determine moments of inertias for areas.	X						

Table 3: Detailed descriptions of the ABET student outcomes (1-7) listed in Table 2.

ABET OUTCOME	DESCRIPTION
1	an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2	an ability to apply engineering design to produce solutions that meets specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3	an ability to communicate effectively with a range of audiences.
4	an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5	an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6	an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7	an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
