

Please take the time to read the entire syllabus and consult it for answers to questions you might have.

Course Number: RADS 4633 x10 3 credit hours
Course Title: **Continuous Quality Improvement in Radiology**
Faculty: Robert Comello, MS, RT(R)
Associate Professor
Centennial Hall, 430E
(940) 397-4801 or 866 575-4305
Fax: (940) 397-4845
E-mail: robert.comello@msutexas.edu

Text: **None**

Additional Resources:

Internet, library

Not required (Excellent resources if you later want to start or improve a CQI or QM program!)

1. [Total Quality in Radiology: A Guide to Implementation by Henry George Adams, et al](#)
2. [The Five Pillars of TQM: How to Make Total Quality Management Work for You by Bill Creech](#)
3. [Quality Management Exam Review for Radiologic Imaging Sciences by Steven Dowd, et al](#)
4. [Quality Management in the Imaging Sciences by Jeffrey Papp](#)
5. [Abujudeh, H., Kaewlai, R., Shaqdan, K., & Bruno, M. \(2017\). Key principles in quality and safety in radiology. *American Journal of Roengenology*, 208\(3\), W101-W109](#)

Prerequisites: **None**

Course Overview:

This course is a study of the principles and methodologies of continuous quality improvement. A comparison with traditional quality assurance will be included as well as implementation standards to satisfy The Joint Commission.

Course Objectives:

Upon completion of this course, the student should be able to:

- Delineate the role of the health care manager in continuous quality improvement
- Describe the 8 step model for continuous quality improvement
- Apply the tools used in implementing a continuous quality improvement program
- Identify the barriers to successful continuous quality improvement.
- Analyze a scenario for the existence of a problem, customer identification, customer needs and expectations, and possible solutions.
- Generate solutions for a problem using relevant tools and procedures.

Introduction

Being a professional means making an investment in your profession. With today's patient being much more informed about health care, and much more discerning about treatment appropriateness and quality, it is vital that you rise to meet the challenges of the patient and health care delivery. As a working technologist, you will be asked to do more with less--more examinations, more patients, in much less time--without compromising quality. As a department director, you will be expected to provide the highest quality care in your department, with fewer people and a great deal less financial support.

The changes that have to be made to allow this to happen will be difficult and many times painful. This course is an overview of the concept of continuous quality improvement and how changes can be made without

increasing the difficulty and pain.

Course Navigation

If you are not familiar with Desire to Learn (D2L), you should spend some time clicking on the various tabs. If a hyperlink within the content area doesn't work, look at the top of the page and try that. It appears that the Tests and Dropbox work better when you click those words at the top of the page.

Several video files are embedded within this course to help you better understand the various charts, graphs, and content. When you click on these, a second window will open to display the video. When finished watching, just close that window and you can return to the course content. *Note: the videos can take up to a few minutes to load. Please be patient as they really can be helpful.*

"Tests" is the link to the unit exams. Please read each unit carefully before attempting the exams. The unit exams are open-book.

Mozilla Firefox seems to work much better than Internet Explorer and Google Chrome does not display discussion boards well at all. It is suggested that Firefox be used in this course.

The unit exams must be completed before you take the final. Any unit exam work not completed will be assigned a grade of 0.

Methodology/Teaching Strategies:

All or some of the following strategies may be used in the delivery of this course: Independent reading assignments, study guide, written assignments,

Assignments/Activities

This course is divided into individual units. A unit examination accompanies each unit of instruction and is designed as an "open book" evaluation of the material. Be sure to complete the unit exam at the end of each unit. Some units may require special drawings, work, etc. for you to completely understand the information. While you will not have to submit this work, you should be familiar with how to construct some of the items as the final **WILL** require you to label, identify, and/or apply these tools and processes. **The final exam is CLOSED notes, using lock down browser and webcam. Pay close attention to those requirements.**

All work submitted to the instructor will be considered complete and final, and will be graded as such.

Student Responsibilities

As a student enrolled in this course, you will be responsible for adhering to and meeting posted deadlines and due dates. All activities for this course are listed at the end of this syllabus. Activities such as quizzes have expiration dates. Please take note that expiration dates for quizzes will differ from deadlines for assignments and activities.

Quizzes and assignments/activities are spaced out in a manner that will allow you ample time to complete them. Assignments/Activities will be accepted on or before the posted due date and deadline. If you choose to wait until the **very last minute** and there is some problem with getting the assignment to me in time, that is the risk that you take and you must accept the penalty.

Penalty:

Any student that missed a quiz expiration date will not be allowed to take the quiz once the time has expired. If this happens, the student will receive a grade of zero (0) for that quiz. If a student misses a deadline for an activity or assignment, that assignment/activity will not be graded and a grade of zero (0) will be given. Assignments can only be submitted once for grading. Emergencies do occur and they will be dealt with on an individual basis. Do not inform me of personal emergencies **after** the deadlines/due dates and expiration dates have passed.

DO NOT WRITE TO ME AND ASK IF I WILL ACCEPT A LATE ASSIGNMENT or GIVE EXTRA CREDIT/WORK. I WILL NOT.

[Discussion Board](#)

There are several discussion board topics posted under the “Discussions” link. You must meet the deadlines to get credit. Spelling, grammar, and substance really do count. Try not to veer off subject, and be respectful and considerate of your fellow student's submissions.

You must post at least **one** original response to the topic AND you must **respond** to at least **2** postings for each topic. The discussion board counts as 15% of your grade. If you do not understand this requirement, please let me know. **Please be aware there are two separate deadline dates. One deadline is for posting your original post and one is for when the discussion board actually closes.**

Proctor:

There will be no proctor for the final. Lock down browser with webcam will be utilized for all examinations. Please be sure to check that your webcam, microphone and a strong and reliable WiFi is working with lockdown browser. Also, **Lockdown browser does not work with Chromebook.**

The Final Exam:

The final exam is mixed format, (short answer, essay, etc.) and you will have two hours to complete it. The final exam is closed book/notes and no supplemental material is allowed. The final consists of a provided scenario with eight separate areas requiring you to identify the problem and work through that problem using the skills you have obtained throughout the semester. The final exam follows exactly the course objectives outlined in the course objectives. The exam is given over Desire to Learn (D2L) by way of Lockdown browser (see note above). The exam is closed notes. No extra books/papers are allowed. You will have 2 hours to complete the exam. When the time expires, you must submit within 5 minutes or the test will auto submit and lock you out. If you have problems with the exam shutting down, anything you have submitted will be saved and you can sign back in as long as the time has not expired. Contact me if you have any problems.

It may take several days to grade this exam, so please be patient.

Communication with Instructor:

Contact information for the instructor is listed at the beginning of this syllabus. ***Email is the preferred mode of communication.*** Please include the course number on all correspondence. It is critical that students report all email changes immediately to the instructor. The instructor will respond or at least acknowledge email messages from students within a maximum of five (5) business days when MSU is in session. Beyond standard university holidays and breaks, the instructor will notify students of any extended periods of time when email contact is not practical (professional meetings, etc)

The instructor will be available to meet face-to-face with any interested students at a designated time and place that will be announced on Desire to Learn (D2L) after the start of classes. This meeting is optional and must be confirmed by email ahead of time with the instructor.

Tentative Class Schedule

There are six units in this course. The first three units and all of the associated assignments should be completed by the date indicated to avoid penalties. This will leave you enough time to finish the remaining units as well as leave time to study for the final exam

Course Schedule

First day of Classes	August 26, 2024
All unit quizzes are open from August 26, 7 am until December 5, 5 pm. This gives you ample time to complete them.	August 26, 7 am
All discussion boards are open. Please be aware that there is a deadline for posting your original post and one for when the discussion board actually closes. See the due dates listed below.	

Introduction discussion board. Introduce yourself to the class.	
Discussion 1 student original posting due 8 am	September 3
Discussion 1 closes at 5 pm	September 16
Discussion 2 student original posting due 8 am	September 16
Discussion 2 closes at 5 pm	September 30
Discussion 3 student original posting due 8 am	September 30
Discussion 3 closes at 5 pm	October 14
Discussion 4 student original posting due 8 am	October 14
Discussion 4 closes at 5 pm	October 28
Discussion 5 student original posting due 8 am	October 28
Discussion 5 closes at 5 pm	November 11
Discussion 6 student original posting due 8 am	November 11
Discussion 6 closes at 5 pm	November 25
Last day to withdraw from a class with a "W"	November 25, 4 pm CST
The unit quizzes must be completed by the date specified on the course calendar. ANY quiz not completed by 5 pm, December 5 will receive a grade of 0.	December 1. All quizzes close at 5 pm
The final exam will be available on December 9th beginning at 7 am through lock down browser with a webcam. The final exam closes on December 10th at 5 pm CST. As a reminder, do not use Chromebook as lock down browser is not compatible. Also, please be sure you have a strong WiFi or internet connection and limited distractions. These are the only dates available. Adjust your personal schedule accordingly. If you take the final after business hours, be aware that there will be no technical help available if problems occur.	December 9th at 7 am and closes on December 10th at 5 pm. See the note on the left.

Grading/Evaluation

Your course grade will be based on the following:

Grading Distribution

Unit exams 40%	40%
Discussion Board postings and responses	25%
Final exam	35%

The following grading scale is used for this course:

Grading Scale

90 and above	A
80-89	B
70-79	C
60-69	D
59 and below	F

Note: This instructor does NOT round up the final course grade.

Special Needs

In accordance with Section 504 of the Federal Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, Midwestern State University endeavors to make reasonable adjustments in its policies, practices, services, and facilities to ensure equal opportunity for qualified persons with disabilities to participate in all educational programs and activities.

The Office of Disability Support Services (DSS) provides information and assistance, arranges accommodations, and serves as a liaison for students, instructors, and staff. The DSS has assistance devices such as books on tape, recorders, and adaptive software which can be loaned to qualified individuals. A student/employee who seeks accommodations on the basis of disability must register with the Office of Disability Support Services in the Clark Student Center Room 168 or call 940-397-4140 for further information. Documentation of disability from a competent professional is required.

Individuals with grievances related to discrimination or lack of accommodation on the basis of a disability are encouraged to resolve the problem directly with the area involved. If the matter remains unresolved, advice and/or assistance will be provided by the Office of Disability Services for resolution. The grievance procedure may be found in the Student Handbook and Activities Calendar.

The director of the Counseling Center services as the ADA Coordinator may be contacted at (940) 397-4618, TDD (940) 397-4515, or 3410 Taft Blvd., Clark Student Center Room 108.

Honor System

RADS 4743 adheres to the [MSU Code of Conduct](#).

In particular, however small, academic dishonesty breaches academic integrity. Your participation in this course comes with the expectation that your work will be completed in full observance of the MSU Code of Student Conduct. You should consult the current Student Handbook for answers to any questions about the code.

All components of RADS 4743 are designed to represent the efforts of each student individually and are NOT to be shared, copied, or plagiarized from other sources. Therefore, when you submit your efforts for grading, you are attesting you have abided by this rule.

An online plagiarism and artificial intelligence screening service may be used in this course. Student assignments may be uploaded to the service to identify similarities to other student papers and published works and to detect AI-generated work.

Cheating includes but is not limited to

- Use of any unauthorized assistance in taking quizzes, tests, or examinations
- Dependence upon the aid of sources beyond those authorized by the professor in writing papers, preparing reports, solving problems, or completing other assignments

- The acquisition of tests or other academic materials belonging to the university faculty or staff without permission

Plagiarism includes but is not limited to

- The use of paraphrasing or direct quotation without correct citation in the text and the reference list
- The published or unpublished works of another person
- You may NOT submit papers and assignments you have previously submitted for this or any other course.
- Using materials generated by agencies engaged in "selling" term papers is also plagiarism.

Artificial Intelligence (AI)-Declaration of Generative AI in Academic Writing

For all writing assignments, the student will not use generative artificial intelligence (AI) to construct the content of the assignment. Doing so is similar to plagiarism, and the assignment may be subject to a grade of zero or failure of the course, depending on the severity of the incident. AI-assisted technologies should only be used to improve readability and language. If used, it is the responsibility of the student to carefully review and edit this content, as AI can generate incorrect, incomplete, or biased information. Using these technologies requires human oversight and control. Additionally, AI and AI-assisted technologies should not be listed as an author or co-author or cited as an author. If the student uses AI-assisted technologies, a disclosure must appear at the end of the document in a separate section before the references, using the following format.

Declaration of Generative AI and AI-Assisted Technologies in the Writing Process

Statement: *During the preparation of this work the author(s) used [NAME TOOL / SERVICE] in order to [REASON]. After using this tool/service, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.*

Academic dishonesty will not be tolerated in this class. When unsure whether a situation will be interpreted as academic dishonesty, you should ask your professor for clarification. If you are guilty of academic dishonesty, a grade of zero (0) will be given for the quiz, assignment, etc. Cases may also be referred to the Dean of Students for possible dismissal from the University.

You are encouraged to review the tutorials and suggested websites for more information about plagiarism. If you have any questions about what constitutes plagiarism, please consult:

- The [University Academic Dishonesty Policy](#).
- The website [Plagiarism.Org](#), or
- The professor

Campus Carry

Effective August 1, 2016, the Campus Carry law (Senate Bill 11) allows those licensed individuals to carry a concealed handgun in buildings on public university campuses, except in locations the University establishes as prohibited. The new Constitutional Carry law does not change this process. Concealed carry still requires a License to Carry permit, and openly carrying handguns is not allowed on college campuses. For more information, visit [Campus Carry](#).

Active Shooter

The safety and security of our campus are the responsibility of everyone in our community. Each of us has an obligation to be prepared to appropriately respond to threats to our campus, such as an active aggressor. Please review the information provided by MSU Police Department regarding the options and strategies we can all use to stay safe during difficult situations. For more information, visit [Safety / Emergency Procedures](#). Students are encouraged to watch the video "Run. Hide. Fight." which may be electronically accessed via the University police department's webpage: ["Run. Hide. Fight."](#)

Administrative Process

Unresolved issues related to this course should be first addressed between the student and the course instructor. If there is no resolution, students must follow this sequence:

- Interim Department Chair: Debra Wynne (940) 397.4679
- College Dean: Dr. Jeff Killion (940) 397.4594
- Dean of Students: Matthew Parks (940) 397.6273

PLEASE NOTE

By enrolling in this course, the student expressly grants MSU a “limited right” in all intellectual property created by the student for the purpose of this course. The “limited right” shall include but shall not be limited to the right to reproduce the student’s work product in order to verify originality and authenticity, and for educational purposes. Specifically, faculty may submit student papers and assignments to an external agency to verify originality and authenticity, and to detect for plagiarism.

Topic Outline

Quality Improvement Development and Principles

Terminal Performance Objective: Upon completion of this unit, the student should be able to identify opportunities for integrating traditional quality assurance models with continuous improvement models.

Enabling Objectives: Upon completion of this unit, the student should be able to:

1. Compare structure methods and scopes of continuous quality improvement to those of traditional quality assurance.
2. Discuss the historical perspective of quality improvement development.
3. State examples which illustrate the "right things done right" interface.
4. Identify factors which contribute to customer satisfaction.
5. Identify factors which contribute to staff retention.
6. Explain the effect of continuous quality improvement on financial viability.
7. Identify strategies for advancement of continuous quality improvement.
8. State the four facets of a comprehensive strategy for continuous quality improvement.

Quality Management

Terminal Performance Objective: Upon completion of this unit, the student should be able to recognize the characteristics and roles of the quality manager and skills that enable effective quality management.

Enabling Objectives: Upon completion of this unit, the student should be able to:

1. Identify principles of quality management, including Deming's 14 points.
2. Identify key roles of the quality manager.
3. Discuss the attributes and abilities of quality managers.
4. Describe the components of the PDCA cycle.
5. Describe the 10 mind-set shifts for managing continuous quality improvement.
6. Perform self-assessments for the Quality Manager mindset.

The Management Model

Terminal Performance Objective: Upon completion of this unit, the student should be able to recognize the importance of identifying customers and understand the effect of professional standards on meeting both customer expectations and operational requirements.

Enabling Objectives: Upon completion of this unit, the student should be able to:

1. Define specifications for a management model.
2. Explain customer-driven management.

3. Identify customers and their expectations.
4. Differentiate between internal and external customers.
5. Discuss the importance of initiating cyclical steps in the management model.
6. Summarize the importance of the role of customer expectations and professional standards in customer driven management.
7. Explain the use of focus groups and interviews.
8. Identify professional standards necessary to satisfy customer needs.
9. Develop a flow chart which identifies the steps of a process needing improvements.
10. Develop a critical path for the previous process.

Developing Measures to Monitor Performance

Terminal Objective: Upon completion of this unit, the student should be able to identify and develop measures to monitor performance.

Enabling Objectives: Upon completion of this unit, the student should be able to:

1. Identify methods for developing measures to monitor performance.
2. Explain the importance of feed back in measuring effectiveness of CQI.
3. Identify key cross-functional processes that impact customer perception.
4. Describe methods for measuring quality.
5. Discuss how involvement and perceptions of staff affects identification, measurement, and collection of data.
6. Identify essential elements in measuring performance.
7. Describe advantages and pitfalls of reporting results and providing feedback.
8. Identify the four ways to share management results with staff.
9. Describe three ways to make priority decisions.
10. Define process.
11. Cite reasons for improving process rather than people.
12. Describe the four phases of the PDCA model for process improvement.

The Manager's Tool Kit

Terminal Objective: Upon completion of this unit, the student should be able to recognize and utilize tools for quality management.

Enabling Objectives: Upon completion of this unit, the student should be able to:

1. Discuss the importance of checks against bias in data collection.
2. Identify the seven tools for collecting and displaying CQI data.
3. Identify the nine tools for making CQI improvements.
4. Give examples of uses of focus groups in CQI.
5. Develop a CQI survey.
6. Give examples of check sheet use.
7. Cite examples of the uses of logs.
8. Define the histogram as a CQI tool.
9. State the Pareto principle and its application in chart form.
10. Analyze control charts for run length, freaks, trends, sudden shifts, and cycling.

The Manager's Tool Kit – Part II

Terminal Objective: Upon completion of this unit, the student should be able to recognize and utilize tools for quality management.

Enabling Objectives: Upon completion of this unit, the student should be able to:

1. Expand the abbreviated flowchart developed in Unit III, or expand a new idea into a SIPOC Chart.
2. Construct a flowchart from the information gathered in the SIPOC.
3. Conduct a brainstorming session.

4. Construct the following: affinity chart, relationship diagram, cause and effect diagram, force-field analysis, decision matrix, tree diagram, and action plan.
5. Analyze gathered information through the use of tools.

*** If you have questions or experience difficulties during the semester, please contact your instructor.***
