

**Business and Economics Statistics
Dillard College of Business Administration**

BUAD 3033, Section 201

Spring 2025

TR: 9:30 am – 10:50 am

Dillard Building 328/335

Contact Information:

Instructor: Dr. Sanchari Choudhury

Office: Dillard Building 220

Office Hours: Tuesday 12:30 pm until 2:30 pm,
Wednesday 2:00 pm until 3:00 pm,
Thursday 12:30 pm until 2:30 pm, or,
By appointment, or,
Email me at any "reasonable" time, as I am usually available

via email.

Phone: 940.397.4834

Email: sanchari.choudhury@msutexas.edu

Text:

Anderson, Sweeney, Williams, Camm, Cochran, Fry and Ohlmann, Statistics for Business and Economics, 14th Edition, Cengage Learning (Required).

MSU Texas Access & Affordability Program (for accessing the textbook):

BUAD 3033 is included in the above program for Spring semester. What does this mean?

- You will have access to your title on the first day of class. Please log into your my.msutexas.edu email and look for the Brytewave email dated Monday, 1/13/25. Follow the instructions to access your title. If you have a Brytewave browser window open already, you will need to close it and log in again to Brytewave.
- The money saving charge of \$53.50 + tax has been added to your student account, which is below the publisher's website price.

- You have the choice to “opt out” of this special pricing and find your material on your own. If you prefer to “opt out”, the instructions will be in your my.msutexas.edu email, from Follett/MSU Bookstore on the second day of class, 1/22/25. The last day to “opt out” and find your content on your own, is 2/17/25. If you “opt out”, you lose your course material. If you “opt out” by mistake, please contact the bookstore at the email address below and you will be “re-instated” with your course materials.

For questions concerning the program or if you need assistance, please contact the Bookstore at jenny.denning@msutexas.edu.

Course Description:

This course introduces students to statistical application methods. Students will learn how to collect, manage, analyze, and interpret business data. Successful completion of the course will allow students to access the information obtainable from a dataset and present the information in a concise and meaningful form. Covered topics include descriptive statistics, probability theory, hypothesis testing, correlation, and regression analysis. The course emphasizes business and economic applications.

Learning Goals:

The general objective of this course is to help participants understand fundamental statistical methods and their applications to economic and business issues. One will gain an understanding and mastery of the relationship and application of statistical methods to real life issues.

A. General Learning Goals:

1. Effective critical thinking and problem-solving skills using statistical methods: Participants will demonstrate their proficiency in critical thinking and problem solving and decision-making abilities by applying statistical methods through homework, in class discussions, and exams.
2. Communication skills: Participants will demonstrate their effective and efficient communication skills when reporting results of statistical analyses.
3. Social Responsibilities: Participants will demonstrate their intercultural competency, civic knowledge, and the abilities to engage effectively in regional, national, and global economic and business issues.
4. Personal Responsibilities: Participants will demonstrate connecting choices, actions, and consequences to statistical analysis and ethics abilities.

These general learning goals represent or are related to those established by

the Dillard College of Business Administration. The goals represent the skills that graduates will carry with them into their careers. While assessing student performance in obtaining these general learning goals, the College seeks to assess its programs. The assessments will assist us as we improve our curriculum and curriculum delivery.

B. Course Specific Learning Goals:

- Understand statistical methods used to describe data
- Learn probability theory
- Learn sampling methods
- Understand confidence intervals
- Understand hypothesis testing
- Conduct correlation analysis
- Conduct regression analysis

Teaching Method:

This is a face-to-face class starting on January 21, 2025, and ending on May 15, 2024, as per the 2024-25 academic calendar. Course material will be presented in class through lectures and discussions. Students are highly encouraged to participate regularly and ask questions at any time. In addition, PowerPoint slides and study guides on each chapter will be uploaded on D2L to assist you in learning at home and preparing for exams and assignments. However, reading the textbook (mentioned earlier) is **mandatory** to understand every concept thoroughly and perform well in the course. We may use Excel now and again for our practical learning. It will be communicated in class and/or through emails on D2L. I will be holding office hours every week (mentioned above) to answer any questions or concerns you may have. If you are stuck with a concept, you can also reach out to me anytime during the week — besides the designated office hours — through email.

You are expected to regularly check D2L for homework assignments and any other announcements about this class. See the tentative course schedule below.

Course Policies:

A. Attendance Policy:

Attending class is mandatory unless you receive my prior approval for missing a class for **compelling reasons**. Anyone absent for more than three days without prior approval may have a letter grade deducted from the overall final grade at the instructor's discretion. For example, anyone with an overall A may earn a B as the final grade if absent for more than three days in the semester without prior approval. All important announcements of this course (like

homework assignments, due exam dates, exam format, etc.) will be made in class. Over and above, every course material is explained and discussed in detail in class. So, failure to attend class will invariably impact your learning process and performance in this course in a negative way.

In addition to the above, attendance will be checked through assignment submissions. Missing four assignments from 01/21/2025 to 02/24/2025 will be considered excessive. Students who reach this level of missed assignments will be automatically dropped with a grade of "F" given the university attendance policy. In addition to this, missing six assignments during the semester is also excessive; students who reach this level of missed assignments will get a final grade of "F" given the university attendance policy. You may find this information in the Student Handbook and Activities Calendar at [Handbook](#). Also note, classroom is not a substitute for day care facility. Hence, you cannot attend a class with a child and if you still choose to do so, you will be asked to leave immediately and counted as absent.

Lastly, you are expected to settle down in the classroom at least a minute before the class formally starts. No late entry will be allowed because once the class starts, the door will be locked from the inside. Entering class late and leaving before time is not allowed unless my prior approval is taken for some compelling reasons. You are also not supposed to walk in and out of the class while the lecture is on (which disturbs both your instructor and your classmates, so be respectful to all).

B. Other Course Related Policies:

Academic Integrity:

As for academic honesty, students must follow the "Student Honor Creed" presented in the [Student Handbook of MSU TX](#) and failure to do so will call for sanctions.

Also, since all your assignments will be conducted through D2L, academic integrity is also applicable in this case. If I learn of students sharing the quiz/assignment contents in any way, that is a breach of academic integrity on all parties' part. Please don't do that, as I don't want to give everyone involved a 0 for the assignments (and potentially an F for the course).

Services for Students with Disabilities:

In accordance with Section 504 of the Federal Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, Midwestern State University endeavors to make reasonable accommodations to ensure equal opportunity for qualified persons with disabilities to participate in all educational, social, and recreational programs and activities. After notification of acceptance, students requiring accommodations should make an application for such

assistance through Disability Support Services, located in the Clark Student Center, Room 168, (940) 397-4140. Current documentation of a disability will be required in order to provide appropriate services, and each request will be individually reviewed. For more details, please go to [Disability Support Services](#).

Campus Carry Policy

Effective August 1, 2016, the Campus Carry law (Senate Bill 11) allows those licensed individuals to carry a concealed handgun in buildings on public university campuses, except in locations the University establishes as prohibited. The new Constitutional Carry law does not change this process. Concealed carry still requires a License-to-carry permit, and openly carrying handguns is not allowed on college campuses. For more information, visit [Campus Carry](#).

Syllabus Change Policy:

This syllabus is a guide for the course and is subject to change with an advanced notice.

Correspondence:

All email correspondence must be conducted using your **Midwestern State University (MSU) email only**. I will not respond to any question sent from any other email account. It is highly recommended that you regularly monitor your both MSU email account and that of D2L. For your own convenience, I suggest that you link your D2L emails with your MSU email account such that any incoming message to D2L account will get automatically forwarded to your MSU email account. Note, grades will be posted on D2L and on MSU Banner and not sent over email.

Inclement Weather Policy:

In case of campus closures due to inclement weather, I will upload recorded lecture videos in the relevant weekly module of the course on D2L. I will send out email notifications via D2L to the entire class regarding this as and when the closure is announced officially by the university.

Technical Support:

I, as your instructor for an economics class can only ensure that all the course materials are in working order but beyond that I cannot provide any technical support to a student's hardware/software problems. For problems related to

D2L, a student is recommended to contact [MSU Distance Education](#).

Late Submissions:

For homework assignments, I highly recommend that students not wait until the last minute to make their submissions. Since all your assignments, case studies and exams will be through D2L, we are heavily dependent on technology that may decide to abandon us at a crucial moment. Therefore, start working on assignments in advance. Any late submission needs prior permission from me and will automatically incur a penalty of ten points unless provided with a compelling reason.

For exams, no make-up exam will be allowed unless a student requests my approval in advance *and* for compelling reasons. If you miss an unexcused exam, you receive a zero and there is **no** exception to this policy.

Lastly, if you have any questions or concerns about your grades, bring that to my attention within one week of the homework/exam is graded.

Monitoring of Exams:

All exams taken on D2L will require Respondus Lockdown Browser and Webcam monitoring. So, every student is expected to have access to a webcam from the beginning of the semester. However, these monitoring tools are **not** compatible with Chromebook laptops, Phones, and Tablets. iPad can be used, but you need to allow it in the setup. Contact [MSU Distance Education](#) to get proper instructions on how to execute this.

Classroom Decorum:

You do not need a laptop in class unless you are more comfortable taking notes there than using pen and paper (even though the latter is recommended since many graphs and diagrams will be drawn on the whiteboard while lecturing). Besides, we may use the computer labs now and again for our practical learning through Excel.

Usage of cell phone or any other device is strictly prohibited in class. If a student is caught to do so, he/she will be prompted to leave the class immediately. All electronic devices must be kept away and muted.

Grading and Evaluation Measures:

Exams: There will be three (non-cumulative) exams altogether, each of equal weight (19% each). So, **57% of your final grade** depends on your exam

performance. This will mainly test your problem-solving ability as you need to *recognize the concept(s)* embedded in each question and then *apply* the concepts learned throughout the course to answer the question correctly. There will be hardly any direct questions in these exams. So, understanding the materials is the only way to succeed in this course, not rote learning.

Homework Assignments: There will be altogether 14 homework assignments, each based on a chapter. These will help you prepare for your exams. But you will never get exactly the same questions on your exams. These assignments will together contribute to **20% of your final grade**. As the course progresses, more information and details will be communicated through emails and on D2L.

Case Study: There will be two case studies altogether in this course that will contribute to **18% of your final grade**. This will evaluate the practical learning aspect of the materials. As we progress, detailed instructions about this assignment will be communicated through emails and on D2L.

Excel Certification: 5% of your final grade will depend on an Excel Certification exam that will ensure you are proficient in working with the Excel software package to manage basic data analysis with it. This will be discussed in more detail in class, and you will get two attempts in total to successfully receive the certification.

Every student is expected to be in touch with me throughout the semester regarding their performances and grades to avoid any semester-end "surprises."

Grading Scale:

A = 90-100%
B = 80-89%
C = 70-79%
D = 60-69%
F = <60%

Note: Final grades MAY be curved depending on the situation and the instructor's discretion. If a curve is implemented in the current semester, students will be communicated about the same before posting the final grades.

Class Schedule:

First day of class: January 21 (Tuesday)
 Last day of class: May 8 (Thursday)
 No class/office hours: March 10 (Monday) – March 14 (Friday) — Spring Break
 April 17 (Thursday) – April 18 (Friday) — Easter Break
 Last day for “W”:
 “F”) April 30 (Monday) by 4 pm (drops after this will receive
 Exam 1: February 20 (Thursday) (*tentative*)
 Exam 2: April 10 (Thursday) (*tentative*)
 Exam 3: May 12 (Monday) (*tentative*)

Course Schedule (all dates are tentative)

Weekly Modules	Chapters	Homework Assignments
Week 1 (January 21 - 27)	Go through the syllabus thoroughly 1 (Data and Statistics)	HW 1: due January 27 (Monday)
Week 2 (January 28 – February 3)	2 (Descriptive Stats: Tables & Graphs) 3 (Descriptive Stats: Numerical Measures)	HW 2 and HW 3: due February 3 (Monday)
Week 3 (February 4 – 10)	4 (Probability Theory)	HW 4: due February 10 (Monday)
Week 4 (February 11 – 17)	5 (Discrete Probability Distributions)	HW 5: due February 17 (Monday)
Week 5 (February 18 - 24)	Review Chapters 1, 2, 3, 4 and 5 Start Working on the First Case Study	Exam 1: due February 20 (Thursday)
Week 6 (February 25 – March 3)	6 (Continuous Probability Distributions)	Case Study I: due February 27 (Thursday) HW 6: due March 3 (Monday)
Week 7 (March 4 – 10)	7 (Sampling and Sampling Distributions)	HW 7: due March 10 (Monday)
Week 8 (March 11 – 17) <i>With Spring Break from March 10 to March 16</i>	8 (Interval Estimation)	
Week 9 (March 18 - 24)	8 (Interval Estimation) revisit	HW 8: due March 24 (Monday)

Week 10 (March 25 - 31)	9 (Hypothesis Testing)	HW 9: due March 31 (Monday) Excel Certification – Attempt 1: due March 27 (Thursday) in-person in DB335
Week 11 (April 1 – 7)	10 (Two Populations)	HW 10: due April 7 (Monday)
Week 12 (April 8 - 14)	Review Chapters 6, 7, 8, 9 and 10 Start Working on the Second Case Study	Exam 2: due April 10 (Thursday)
Week 13 (April 15 - 21) <i>With Holiday Break from April 17 – 18</i>	11 (Population Variances) 12 (Multiple Proportions and Goodness of Fit)	HW 11 and HW 12: due April 21 (Monday)
Week 14 (April 22 - 28)	14 (Simple Linear Regression)	Case Study II: due April 24 (Thursday) HW 13: due April 28 (Monday)
Week 15 (April 29 – May 5)	15 (Multiple Regression)	HW 14: due May 5 (Monday) Excel Certification – Attempt 2: due May 1 (Thursday) in-person in DB335
Week 16 (May 6 – 12)	Review Chapters 11, 12, 14 and 15	Exam 3: due May 12 (Monday)
