

Dillard College of Business Administration
SYLLABUS: Introduction to Business Analytics
MIS 5113, Section X40
Summer II 2025

Contact Information

Instructor: Dr. Grace Zhang, Professor of Management Information Systems

Zoom meeting can be requested by appointment with the link: [Zoom Virtual Meeting](#)

Texting or Cell: (206)-724-1509

Email: grace.zhang@msutexas.edu

Course Materials:

- *Analytics, Data Science, & Artificial Intelligence: Systems for Decision Support*, **11th edition**, by Ramesh Sharda, Dursun Delen, Efraim Turban. Pearson Publishing.
- Lecture notes and other materials will be provided in class and on D2L. D2L is the primary communication channel for the course.
- Codecademy FREE account to finish the Learn SQL course at: <https://www.codecademy.com/learn/learn-sql>
- Altair AI Studio (formerly RapidMiner Studio) is required for hands-on assignments. Altair AI Studio (formerly RapidMiner Studio) can be downloaded with a one-year **educational license for free**. Please use your .edu email address to sign up at: <https://my.rapidminer.com/nexus/account/index.html#signup>. Please make sure you check the purpose radio button of “**Educational Purpose**.” Please make sure you have a proper device to work with the software. Note that Chromebook will **NOT** be able to accommodate this software.
- In addition, you need to access to <https://academy.rapidminer.com/learn/course/machine-learning-professional/introduction/welcome?page=1> for all the hands-on tutorials and sample demo videos. The best approach for tracking your progress of learning tutorials is to set up an **Altair RapidMiner Academy** account such that your progress can be tracked.

Course Description:

This course provides an overview of the business analytics ecosystem with introductions to three types of analytics: descriptive, predictive, and prescriptive. Applications and tools of business analytics are the focus. In addition, data foundations, as well as big data concepts, are also discussed.

Course Prerequisite:

Consent of the Graduate Coordinator.

Learning Goals

I. General Learning Goals:

- **Our students will produce creative responses to business situations.** The class assignments require students to apply analytics to respond to a real-world business data scenario. Descriptive, predictive, and prescriptive tools will be covered in various chapters, e.g., SQL and RapidMiner.

These general learning goals are among those established by the Dillard College of Business Administration. General learning goals represent the skills that graduates will carry into their careers. While assessing student performance in obtaining these general learning goals, Dillard College is assessing its programs. The assessments will assist us as we improve our curriculum and curriculum delivery.

II. Course-Specific Learning Goals: After completing this course, students should be able to:

- Understand the several types of analytics and review selected applications
- Learn about descriptive and inferential statistics
- Understand the importance of data/information visualization
- Learn the standardized data mining processes
- Learn different methods and algorithms of data mining for predictive analytics
- Understand different methods and algorithms of machine learning for predictive analytics
- Become familiar with several types of deep learning methods for predictive or cognitive analytics
- Know the process of text mining for business analytics
- Understand the applications of prescriptive analytics techniques using optimization and simulation
- Become familiar with the wide range of enabling technologies for Big Data analytics
- Complete RapidMiner Machine Learning Certification and Learn SQL in Codecademy.

Course Policies

Missed Examination, assignments, and class activities Policy: This is an online course spanning only five weeks. Therefore, we need to emphasize self-study and planning on finishing course assignments. An ample time window will be provided to take exams and complete tasks. **Written verification is mandatory for late or missing work.** The instructor must be contacted by the day of the scheduled activity, or makeup will NOT be allowed. A deduction may be assessed for a late exam or assignment at the instructor's discretion.

Grading and Evaluation: Students' performance will be assessed using the following elements.

1. **Exams (3):** D2L Exams are in the format of the open book and open notes. However, the exam will be proctored by Respondus Monitoring Program with a web camera. The exam will be **auto-submitted** once time runs out.
2. **Online learning hands-on (12):** Online learning videos for hands-on demo exercises are required every week using RapidMiner Studio. Students are

responsible for walking through the learning demonstrations. There is also a certification test at the end of the semester.

3. **Codecademy SQL online learning:** Students are required to finish the "Learn SQL" unit. Please only work on the FREE portion of the courses.
4. **Participation:** Class participation in all formats (questions, answers, comments, and feedback) is highly encouraged to achieve a good participation grade.

Points will be allocated using the following scheme:

Element	Points
Exam (3)	60
RapidMiner Online Learning Hands-on	18
Codecademy SQL Learning Unit	10
RapidMiner Machine Learning Certificate	10
Participation	2
Total Points	100

Course Content and Outline: See the attached content outline/tentative schedule.

Academic Integrity

Students are referred to as the "Student Honor Creed" of the Midwestern State University Graduate Catalog regarding academic honesty. Academic dishonesty (cheating, collusion, and plagiarism) is taken seriously and will be investigated. The minimum penalty is an "F" in this course and referral to the Dean of Students for disciplinary action, resulting in expulsion from the University. **All assignments and exams are expected to be done individually unless stated otherwise. Sharing computer files to assist another student is considered a violation of academic integrity for BOTH students.**

Americans with Disabilities Act

Suppose a student has an established disability defined in the Americans with Disabilities Act and would like to request an accommodation. In that case, that student should please contact me as soon as possible (i.e., within the first week of the semester). This class follows the guidelines suggested by the Center for Counseling and Disabilities Services for those students who qualify for disability services. Please refer to the details in the Midwestern State University Graduate Catalog.

Syllabus Change Policy

This syllabus is a guide for the course and is subject to change. It is not a contract. Syllabus changes will be communicated by notification on D2L and may or may not result in document changes. The student's sole responsibility is to find out if anything affecting the course requirements has changed. **Please check D2L and school emails regularly!**

Tentative Schedule: Please keep this syllabus as a reference!

Week	Date	Day	Chapter	Topic	Dues
1	7/Jul	Monday	1	Overview of Business Intelligence, Analytics, Data Science, and AI	
	8/Jul	Tuesday	1	Overview of Business Intelligence, Analytics, Data Science, and AI	Self introduction & Syllabus Quiz
	9/Jul	Wednesday	3	Nature of Data, Statistical Modeling, and Visualization	RapidMiner Machine Learning (ML) Professional Course - Welcome
	10/Jul	Thursday	3	Nature of Data, Statistical Modeling, and Visualization / SQL Supplement	Codecademy Learn SQL Unit Completion
2	14/Jul	Monday		Exam 1 Chapter 1, 3, and basic SQL	
	15/Jul	Tuesday	4	Data Mining Process, Methods, and Algorithms	RM ML Course - Getting Started
	16/Jul	Wednesday	4	Data Mining Process, Methods, and Algorithms	RM ML Course - Intro to ML (part 1)
	17/Jul	Thursday	5	Machine-Learning Techniques for Predictive Analytics	RM ML Course - Intro to ML (part 2)
3	21/Jul	Monday	5	Machine-Learning Techniques for Predictive Analytics	RM ML Course - Supervised Learning (part 1)
	22/Jul	Tuesday	6	Deep Learning and Cognitive Computing	RM ML Course - Supervised Learning (part 2)
	23/Jul	Wednesday	6	Deep Learning and Cognitive Computing	RM ML Course - Supervised Learning (part 3)
	24/Jul	Thursday		Exam 2 Chapter 4, 5, and 6	
4	28/Jul	Monday	7	Text Mining, Sentiment Analysis, and Social Analytics	RM ML Course - Scoring
	29/Jul	Tuesday	7	Text Mining, Sentiment Analysis, and Social Analytics	RM ML Course - Unsupervised Learning (part 1)
	30/Jul	Wednesday	8	Prescriptive Analytics: Optimization and Simulation	RM ML Course - Unsupervised Learning (part 2)
	31/Jul	Thursday	8	Prescriptive Analytics: Optimization and Simulation	RM ML Course - Feature Engineering
5	4/Aug	Monday	9	Big Data, Cloud Computing, and Location Analytics: Concepts and Tools	RM ML Course - Auto Model
	5/Aug	Tuesday	9	Big Data, Cloud Computing, and Location Analytics: Concepts and Tools	Makeups and Reviews
	6/Aug	Wednesday		Exam 3 Chapter 7, 8, and 9	
	7/Aug	Thursday		RapidMiner ML professional certification test
