Textbook & Instructional Materials

Course Description

This course includes a systematic exploration of phoneme articulation, fluency, assessment procedures, and data collection methods used to evaluate student growth and the effectiveness of instructional approaches.

Course Objectives/Learning Outcomes/Course Competencies

This course aligns with instructional characteristics outlined in the Texas Dyslexia Handbook and prepares educators to deliver evidence-based dyslexia intervention with fidelity and professional judgment.

Upon successful completion of this course, students will be able to:

1. Apply knowledge of the structure of the English language

Demonstrate understanding of phonological awareness, sound–symbol relationships, syllable instruction, morphology, and syntax, consistent with the Texas Dyslexia Handbook requirement that dyslexia instruction address the structure of language.

2. Deliver explicit, systematic, and cumulative instruction

Implement instruction that is direct, sequential, cumulative, and clearly explained, aligning with the Handbook’s requirement that dyslexia intervention be explicit, systematic, and structured.

3. Use multisensory instructional methods

Integrate visual, auditory, kinesthetic, and tactile modalities within instruction, consistent with the Handbook’s expectation for multisensory techniques in dyslexia intervention.

4. Monitor student progress using data-based decision making

Collect and analyze student performance data to evaluate instructional effectiveness and student response, in alignment with the Handbook’s emphasis on ongoing progress monitoring.

5. Demonstrate fidelity of implementation

Deliver instruction as designed while maintaining consistency in instructional routines and lesson progression, reflecting the Handbook’s expectation that dyslexia intervention be delivered with fidelity.

6. Adjust instruction based on student response

Use student performance data to determine the need for reteaching, additional practice, or pacing adjustments while maintaining systematic instructional progression, consistent with the Handbook’s requirement for responsive instruction.

7. Explain the role of dyslexia intervention within educational systems

Describe how dyslexia intervention functions within general education, special education, and multi-tiered systems of support, consistent with the Handbook’s guidance that intervention supports instruction but does not replace comprehensive evaluation or eligibility determination.

8. Demonstrate professional and ethical practices in dyslexia intervention

Apply professional judgment, collaboration, and reflective practice when delivering dyslexia intervention, consistent with the Handbook’s expectation that instruction be delivered by trained personnel using research-based practices.

Videos should have good sound quality and visual presentation. Attach your video in D2L using the dropbox provided. MP4 is the best option for video submissions. Also, your video must be under 2G. Do not wait until the last minute to upload your video and if you have taken other MSU courses for the dyslexia program, do not submit the same video lesson that you have previously submitted.

### **Lesson Demonstration videos are preferred for this course.**

### **Practicum Hours Log**

Students will submit their hours on the same approved form requested by the training center/Qualified Instructor attending/attended. If you are still in training, submit all hours you have accumulated to the point of document submission. If you have completed training, submit the total hours on the approved form.
