EDUCATION AND PROFESSIONAL CERTIFICATIONS

Educational

Ph.D.	Texas Woman's University	2006	Health Studies, Higher Education Track
M.S.R.S.	Midwestern State University	1998	Master of Science in Radiologic Science, Education Track
B.S.R.S.	Midwestern State University	1992	Bachelor of Science in Radiologic Science
R.T. Certificate	Lutheran Radiology Academy	1990	Radiologic Technology

Professional Certifications

Registry: The American Registry of Radiologic Technologist (Number: 242227)
Quality Management: 1999 - Present
Radiography: 1990 - Present

License: Texas Medical Board (Number: 27633)

Post-Degree Training

Harvard Institutes for Higher Education, Management Development Program, Harvard Graduate School of Education, Cambridge, MA, Selected participant for on campus program, 2019

PROFESSIONAL EXPERIENCE

POSTER PRESENTATIONSJuly, 2016 (National)

Wagner, J. B., Freedman, B., Getchell, S., Reeder, E., & Killion, J. B. (2016, July). Effect of computed radiography lab equipment on ARRT image acquisition and evaluation scores in two undergraduate radiologic technology programs. University of North Texas College of Information, Annual Research Exchange Conference, Orlando, FL.

April 8, 2011 (Local)

Dr. James Johnston, Dr. James Killion, Dr. Beth Vealé, and Robert Comello, presented a poster at the second Annual Scholarship Colloquium at Midwestern State University. The title was “U.S. Technologist’s Radiation Exposures Perceptions and Practices.”

April 8, 2011 (Local)

Dr. James Johnston, Dr. Jeff Killion, Dr. Phyllis Behrens, Barbara Curran, Dr. Gary Fashimpar, Dr. Laura Fidelie, Jennifer Gresham, and Dr. Kim Robinson presented a poster at the second Annual Scholarship Colloquium at Midwestern State University relating to interdisciplinary education. The title was “An Instrument to Assess Effective Communication Skills in Healthcare Students.”

APPLIED RESEARCH

Training of Mental Health Practitioners in Texas State Hospitals

As a part of the Health and Human Services Commission and Midwestern State University Academic Partnership Program, a task force, consisting of Dr. Satya N. Ayinagadda of Social Work, Dr. Jeff Killion, Dean of the Gunn College of Health and Human Services, Dr. Catherine Pankonien of Nursing from MSU and Raul Luna from HHSC, conducted a needs assessment study of mental health practitioners in 16 state hospitals and associated health centers in Texas. As many as 226 nurses, nursing assistants, nurse practitioners, administrators, social workers, and other professionals participated in this study. The participants of this study expressed the need for continuing education training in various work areas ranging from practical communication skills to forensics. Therefore, in its September 2019 meeting, the HHSC-MSU Partnership Work Group discussed the findings of the study and resolved to conduct training for a cohort of 10 unlicensed mental health practitioners in three thematic areas in the first phase. The themes are 1. Therapeutic communication, 2. Ethical boundaries in clinical practice and 3. Crisis management and prevention. It is proposed to have a one training program in spring 2020. The proposed training aims to impart the participants the required skills and techniques that will enable them to utilize theoretical and clinical knowledge to manage mental illness states and assess a patient's mental health and focus on mental health promotion and disease prevention.

Use of HESI entrance exam to reduce Radiologic program attrition

Researching the use of the HESI entrance exam as a tool to help reduce program attrition. Worked with two Radiologic faculty members and one faculty from College of Science and Mathematics to research the use of the HESI entrance and exit exams as predictors for student success. Radiologic science educators are challenged to accept students who will be successful in completing an entry-level radiologic technology program and provide competent and safe care to patients as an allied healthcare professional. Students' capabilities to complete program requirements and pass state and national certification examinations reflect on both the program and school. The research followed two cohorts of students through the program from 2012 – 2015. Research was published 2017 in *The Journal of Medical Imaging and Radiation Sciences*

Radiation Dose Trends Project

Radiation dose trends and radiographer perceptions and responsibilities. This research focuses on the recent change in primary source of radiation exposure to the U.S. population from natural sources to man-made sources and the role and perceptions of the U.S. radiographers in this trend. A national survey was conducted in 2009 with completion and presentation of results in December of 2009. A manuscript was submitted and accepted for publication early in 2011

Quantification of Effective Communication Skills

This research project with the Interdisciplinary Committee will ultimately create an instrument to assess communication skill to use as one admission criterion for prospective healthcare students. A literature review was completed and from that an instrument created. It was pilot tested in spring of 2010. A case study of the college of Health Science and Human Services students was conducted. A manuscript was published titled *An Instrument for Assessing Communication Skills of Healthcare and Human Services Students* in the peer review Internet Journal of Allied Health Science and Practice. Faculty members included Dr. James Johnston (Radiologic Science), Dr. Laura Fidelie-Woods (Criminal Justice), Dr. Kathleen Roberts (Nursing) and Dr. Phyllis Behrens (Health and Public Administration).

Community Profile Project

Wichita Falls Affiliate of the Susan G. Komen Foundation Community Profile Report. This research project began with an analysis of provided state and county data regarding women's breast health and breast health services. After analysis of this data, two surveys were created to gather additional information from providers and key informants in the service area to fill gaps in the data. From the analysis of all data gathered a report was written summarizing findings, determining priorities for the affiliate, and formulating an action plan to address these priorities over the next three years (2009-2012). The report was submitted to the Susan G. Komen Headquarters on behalf of the Wichita Falls Affiliate March 2009.

A second Community Profile Project Report was completed using the above methodology in 2011. From the analysis of all data gathered a report was written summarizing findings, determining priorities for the affiliate, and formulating an action plan to address these priorities over the next three years (2011-2013). The report was submitted to the Susan G. Komen Headquarters on behalf of the Wichita Falls Affiliate March 2011.

Math Anxiety Project

A team consisting of a graduate student and three faculty members (Donna Wright, James Johnston, and I) assessed math anxiety among entering radiography students. Are goal of the study was to better understand the variables affecting students' career choices and their anxieties about mathematics. Results were published in *Radiologic Science and Education* (2008).

Radiologist Assistant Performance Improvement Project

Radiologist Assistant students and three faculty members (Donna Wright, James Johnston, and I) developed an instrument to collect data in the clinical environments. This was the first official formal documentation of the emerging role of Radiologist Assistants. Results were published in *Radiologic Technology* (2008). Research for this project is still ongoing.

New Radiographic Positioning Landmarks for the Scapula Project 2005-2008

Three Radiologic faculty members (James Johnston, Bob Comello, and I) researched new radiographic positioning landmarks for the scapula. We conducted an extensive review of literature, compiled data from surveying students at clinical, performed experiments in the radiology lab with phantoms, and gathering data from the radiology department at United Regional Hospital. From this research new positioning landmarks have been identified that improve the positioning of the scapula for various medical imaging examinations. The clinical data collection was completed and the subsequent paper published in *Radiologic Technology* (2008).

CONSULTATIONS

2019 – Present: Advisory Board Member for the North Central Texas College Associate of Science in Radiologic Sciences program

2021 – Served as an external tenure evaluator for Dr. Tammy Webster for the University of Nebraska Medical Center Omaha, NE

2021 – Served as an external tenure evaluator for Dr. Wade Redman for the Texas Tech University Health Sciences Center

2018 – 2020: Served on dissertation committee for Rodney Fisher, Trident University

2014 – 2020: Served on dissertation committee for Erica Wight, Grand Canyon University

2015 – 2016: Served on dissertation committee for Glenn Levicki, Medial University of South Carolina

2016 August: Served as an external reviewer (Chair of review committee) for the BS Radiologic Science Program at The University of Oklahoma

2016 – ERB Reviewer – Journal of Occupational Health Southern Africa – “Occupational health and safety in radiographic film processing in Limpopo Province”.

2008 – 2015: Continuing Education Item writer the peer review journal Radiology Management of The American Healthcare Radiology Administrators (AHRA).

2013 – 2015: Advisory Board Member for the Bachelor of Science in Radiologic Sciences program. Pima Medical Institute, Tucson, AZ

2013 – 2014 Advisory Board Member (As a distant education expert) for the Associate of Science in Radiologic Sciences program. Pima Medical Institute, Tucson, AZ

2014, May: Served as an external reviewer for the BS Radiology Program at The University of Cincinnati

2012, October: Assisted with the filming of a RA legislative bill video at Midwestern State University for the American Society of Radiologic Technologists

2011, July: Assisted with the filming of a RA Preceptor Video at UT Southwestern Medical Center for the American Society of Radiologic Technologists

2011, February: Served as an external reviewer for the AS and BS Radiology Programs at Holy Family University in Philadelphia, PA

2007 – 2008: Served as a consultant for the American Society of Radiologic Technologists for the revision of the Bachelors in Radiological Science curriculum.

2004 – 2007: Serve as a consultant for the American Society of Radiologic Technologist Leadership Academy for Educators.

2003: Served as a consultant with the American Registry of Radiologic Technologist and the American Society of Radiologic Technologists for the establishment of a new Radiologic Science career track, the Radiologist Assistant.
