

Tanya Rose

Objective

To continue to serve as a nurse educator in positions that allow for clinical administration, instruction, success coaching or instruction of healthcare staff, nursing students and members of the public. Clinical education and evaluation. Classroom management, curriculum adherence, clinical and simulation lab skills, all proven by over ten years in nursing education.

Profile

Doctoral nursing student who is a motivated, nursing professional with a completed Masters degree in nursing education. An experienced nursing educator who has taught in the hospital, community and in academia. An experienced Remediation Teacher who has metamorphosed into the role of nurse educator. Passionate Nurse Educator with a love for nursing remediation, skill building to decrease attrition. Unique ability to create programs that target student needs to increase student persistence and completion. A team player. Accustomed to the invisible mountain of documentation that is partnered with academia. Demonstrated history of commitment to educating a multicultural population and to teaching the new traditional and ESOL students.
