Texts:

Required:

Groth-Marnat, G. (2016). *Handbook of psychological assessment* (6th ed). Hoboken, NJ: Wiley.

Graham, J. R. (2011). MMPI-2: Assessing personality and psychopathology (5th ed). New York: Oxford University Press.

Course Description: This course deals with the administration, scoring, interpretation, integration and synthesis of personality assessment approaches and instruments. We will be covering a variety of techniques and instruments, each of which is widely used in psychological practice. Mastery of these approaches and instruments is extremely important in your development as a psychologist.

This is a mastery course; as such, there are no exams or term papers. The emphasis will be on your developing at least minimal competence in all content areas. Minimal competence includes writing skills in addition to scoring, interpretation, etc. Over the course of this semester, you will be writing eight reports (tentatively). Some of these will consist of interpretations of single instruments, while others will require integration and synthesis of multiple instruments. You will be required to achieve a grade of at least “OK” on each report; if you fail to achieve an “OK” grade, you will be required to rewrite the report until you do so. As a result, you will be guaranteed an “A” in the course, assuming you turn in all reports on time. Late reports will not be accepted.

Please note that this schedule is tentative, and is subject to change, as circumstances dictate.

You may test up to two adolescents (ages 13-18) over the course of this semester. Please note that adolescents require an additional consent form, to be signed by their parent/guardian. Your other subjects should be 18 or older, and should not be friends or family members. I strongly suggest that each of you develop a pool of subjects which you then share with your peers; it is also possible that various undergraduate classes may provide either extra credit or research credit for participating in these evaluations.

No feedback will be given to your subjects. All reports must be typewritten and double spaced. Each report will be accompanied by the appropriate profile sheets and a copy of your working notes for interpretation.

Attendance Policy: You are expected to attend class; failure to do so will reflect on your commitment and professionalism. Beyond that, considerable time will be spent on interpretive exercises in class, and this is a crucial component of this course.

Senate Bill 11 passed by the 84th Texas Legislature allows licensed handgun holders to carry concealed handguns on campus, effective August 1, 2016. Areas excluded from concealed carry are appropriately marked, in accordance with state law. For more information regarding campus carry, please refer to the University's webpage at <https://mwsu.edu/campus-carry/rules-policies>.
